

TIRUCHIRAPPALLI DISTRICT DISASTER MANAGEMENT PLAN-2024

Tiruchirappalli District Disaster Management Plan – 2024

S. No.	Particulars	Page No.
1.	Introduction	1
2.	District Profile	2-4
3.	Disaster Management Goals (2015-2030)	5-12
	Covid -19	13-14
4.	Hazard, Risk and Vulnerability Analysis with Maps (District map, Division maps, Taluk maps & list of Vulnerable area)	14-57
5.	Institutional Mechanism	58-60
6.	Preparedness	61-64
7.	Prevention and Mitigation measures (2015 – 2030)	65
8.	Response Plan (Including Incident Response System)	66
9.	Recovery and Reconstruction Plan	67-68
10.	Mainstreaming Disaster Management in Development Plans	69-70
11.	Community and other Stake holder participation	71-72
12.	Linkages / Co-ordination with other agencies for Disaster Management	72
13.	Budget and Other Financial allocation – Outlays of major schemes	73-74
14.	Monitoring and Evaluation	75
15.	Risk Communication Strategies	76-77
16.	Important Contact Numbers and provision for link to detailed information (All Line Department, BDO, EO, VAO's)	78-125
17.	Dos and Don'ts during all possible Hazards	126-132
18.	Important Government Orders	133-134
19.	Linkages with Indian Disaster Resource Network	135
20.	Vulnerable Groups details	135
21.	Mock Drill Schedules	136-138
22.	Date of approval of DDMP by DDMA	139
23.	Annexure 1 – 13	139-176

I firmly hope that this book will be very helpful to all officers in the district to reduce the disaster risk. The District Administration leaves dynamic space wide open for suggestion for improvement in the future document

District Collector & Chairman
District Disaster Management Authority,
Tiruchirappalli.

LIST OF ABBREVIATIONS

S. No.	Abbreviation	Explanation
1.	AO	Agriculture Officer
2	AF	Armed Forces
3	BDO	Block Development Officers
4	DDMA	District Disaster Management Authority
5	DDMP	District Disaster Management Plan
6	DEOC	District Emergency Operations Center
7	DRR	Disaster Risk Reduction
8	DERAC	District Emergency Relief Advisory Committee.
9	DRDA	District Rural Development Agency
10	EWS	Early Warning System
11	H & R.R.	Highways and Rural Roads
12	H & R.W.	Highways and Rural Works
13	IDRN	India Disaster Resource Network
14	IFS	Indian Forest Service
15	IMD	Indian Meteorological Department
16	MGNREGA	Mahatma Gandhi National Rural Employment Guarantee Act
17	MAH	Major Accident Hazard
18	NCC	National Cadet Corps
19	NGO	Non Governmental Organization
20	NDRF	National Disaster Response Force
21	ORS	Oral Rehydration Salts
22	PHC	Primary Health Centres
23	RTO	Regional Transport Officer

Tiruchirappalli District Disaster Management Plan – 2024

24	RD & PR	Rural Development and Panchayat Raj Department

INTRODUCTION

District Disaster Management Plan (DDMP) is a key device with set of guidelines for Emergency Management. DDMP is the source for District Level Disaster Preparedness, Prevention and Mitigation, Monitoring and to prepare Disaster Management periodical reports. DDMP has been prepared based on the impacts of past disasters in Tiruchirappalli District and it is designed as an action plan. While preparing this plan, utmost attention, has been paid to make it handy and relevant to Crisis Management.

The vision of the DDMP is to develop Tiruchirappalli District as a Disaster resilient district. If any Disaster occurs the resources from this DDMP, can be ordered without delay and it will reduce the response time which is more important in Crisis Management.

Aims and Objectives of the District Disaster Management Plan:

- ❖ To engage activities which may help in minimizing the damages caused by disasters in both urban and rural areas.
- ❖ To make endeavors towards creating awareness among the people about disasters and its consequences and to prepare them in advance to face such situations and to ensure their participation in the disaster mitigation plans.
- ❖ Existing institutional arrangements, interdepartmental linkages, role of NGOs, Voluntary Agencies and Local Communities so as to understand their capabilities to mitigate specific disasters, which will also facilitate effective coordination in their activities in times of need.
- ❖ To act as an agency for the execution of Disaster Management Schemes of the Government and the NGOs.
- ❖ To evolve information reporting and monitoring tools for preparedness, immediate response and damage assessment, keeping in view the socio-economic conditions of urban and rural areas.

CHAPTER -02

DISTRICT PROFILE

Tiruchirappalli district is located in the banks of Cauvery River in Tamil Nadu, India. The main town in Tiruchirappalli District is the City of Tiruchirappalli, also known as Trichy is the fourth Largest city of Tamil Nadu During the British Raj, Tiruchirappalli was known as Trichinopoly, and was a district of the Madras Presidency; it was renamed upon India's declaration of independence in 1947.

GEOGRAPHY AND HISTORY OF TIRUCHIRAPPALLI

Tiruchirappalli district sites almost at the geographic centre of Tamil Nadu. The district has an area of 4,404 square kilometers. The north most and south most parts of the district are hilly, central part of the district is Cauvery plains. Trichy district is diverse in landscape, mixture of fertile, delta, valleys, hilly areas, semi arid zones. Trichy a land locked with 10 districts is the highest in the state, in the north by Salem district, in the northwest by Namakkal district, in the northeast by Perambalur district in East by Ariyalur district and Thanjavur district, in the southeast by Pudukkottai district, in the south by Madurai district and Sivagangai district, in the southwest by Dindigul district and, in the west by Karur district.

The Kaveri river flows through the length of the district splitting the district into north and south, is the principal source of irrigation and drinking water.

❖ Geographical Position

North Latitude	between 10 to 11 - 30'
East Longitude	between 77 - 45' to 78 - 50'

It is situated 326 Kms South of the State Headquarters of Chennai.

The district had experienced cyclone and flood havoc in 1924, 1952, 1954, 1965, 1977, 1979, 1983, 1998 and 1999, and ravaged floods in 2005. The rivers Cauvery, Coleroon and their tributaries, which form a net work of irrigation system, naturally inundate larger areas during floods. Besides, the perennial rivers, there are many jungle streams in this district which carry rain water towards the Bay of Bengal. The North East Monsoon has all along been the main reason for the cyclone, as well as floods in this district. The cyclonic storm takes a heavy toll of human life and cattle besides heavy damage to coconut and other trees resulting in disruption of traffic, pulling-down telephone and electric installations.

Channels in the left bank are

a. North East Monsoon-2023	205.93
b. South West Monsoon-2023	271.16
Maximum Temperature	40.2 °C
Raingauge stations	24

CHAPTER - 3

DISASTER MANAGEMENT GOALS

SENDAI FRAME WORK

The Sendai framework for Disaster Risk Reduction 2015-2030 was adopted at the third UN world conference in Sendai, Japan on March 18 2015. The Sendai framework emphasizes, the implementation of measure that target the three dimensions of disaster risk, including exposures to hazards, vulnerability and capacity and the characteristics of hazards. Its primary goal is to prevent the emergence of new risks, diminish existing risk and enhance resilience. Responding to the dramatic increase in extreme weather events and mega disasters is one of the great challenges of our present age. Rapid urbanization and population growth in hazard-prone areas and coastal areas make action all the more urgent. Disaster Risk Reduction is a top priority, as we seek to hold back the tide of rising economic and human losses. Its impact can be catastrophic for poverty reduction and sustainable development efforts, especially in a country like ours.

Unexpected rains, causing Urban Flooding in many low lying area of the district, Lightning are other forms of recurrent disasters affecting the communities. Land use pattern in the city has also changed drastically which adds to severity of the disaster. It is high time that every district whether big, medium or small starts focus Sendai Framework For Disaster Risk Reduction (2015-30) to reduce risks and vulnerabilities, to adopt systematic and scientific planning process to mitigate disaster risks and vulnerability factors. Building capacities of state, district and local body institutions and of the communities who live with hazards are most important and are prelude for Disaster Risk Reduction initiatives.

Scope and Purpose of District Disaster Management Plan

The present plan-2024 will apply to risk of (a) small-scale and large scale (b) frequent and infrequent (c) sudden, slow and on set disasters caused by man-made or natural hazards as well as related to environmental, technological and biological hazards. It aims to guide the multi-hazard management disaster risk in development at all levels as well as within and across all sectors

DDMP discussed in detailed about types of disasters prone to the district. Natural disasters related to weather like flood, lightning and thunder, disaster related to geology like earthquake, disaster related to anthropology. It also discussed about Man-made disasters like fire, accident, festival stampede, epidemic outbreak etc. This will be discussed detailed in Hazard, Risk and vulnerability assessment chapter.

District Disaster Management Plan discussed about management of any type of disasters, Occurrence of anyone of the disaster always brought us two or many secondary disasters, say flood may cause epidemic outbreak, an earthquake may result in fire accidents, dam failure, bridge collapse etc. Thus DDMP focus on Multi-hazard Management Disaster Risk in development at all levels as well as within and across all sectors

EXPECTED OUTCOME

Expected outcome of District Disaster Management Plan (2023-24) is substantial reduction in disaster risk and losses in lives, livelihoods and health in the economic, physical, social, cultural and environmental assets of persons, business, communities and countries.

Goal of the Disaster Management Plan

1. To prevent new and existing disaster risk through implementation of integrated and inclusive economic, structural, legal, social, health, cultural, educational, environmental, technological, political and institutional measures.
2. These measures prevent and reduce hazard exposure and vulnerability to disaster.
3. Increasing preparedness for response and recovery and thus strengthen resilience.

Authority for District Disaster Management Plan:

In accordance with the ‘Section 30’ of the ‘Disaster Management Act, 2005’ Sub-section (1) “The District Authority shall act as the district planning: co-coordinating and implementing body for disaster management and take all measures for the purpose of disaster management in the district, in accordance with the guidelines laid down by the National Authority and the State Authority.

Evolution of DDMP:

The District Magistrate who is the Chief co-ordinator will be the focal point for co-ordinating all activities relating to prevention, mitigation and preparedness apart from his existing responsibilities, pertaining to response and relief. The District Coordination and Relief Committee is being re-constituted/re-designated into Disaster Management Committees with officers from relevant departments being added as members.

The line departments and Taluk Tahsildars have assessed the disasters pertaining to Tiruchirappalli District and prepared their own Disaster Management Plans and submitted for the scrutiny of the District Disaster Management Authority which has the following members.

1.	District Collector	Chairperson
2.	District Panchayat Chairperson	Co-Chairperson
3.	District Revenue Officer	Chief Executive Officer
4.	Superintendent of Police	Member
5.	Joint Director of Health Services	Member
6.	Personnel Assistant (General) to the Collector	Member
7.	Project Director of DRDA	Member

Stakeholders and their responsibilities:

The measures to be taken during the occurrence of different types of disasters are listed below:

Sl. No.	Emergency responsibilities	Stakeholder/responsible agency
1.	Activation of Trigger Mechanism	District Disaster Management Authority
2.	Risk communication through wireless / telephone.	District Emergency Operations Centre

3.	Evacuation of people	Revenue Department, PWD, Urban & Rural Local bodies, Police, Fire and Rescue Services, Home Guards, Armed Forces, Volunteers, 108 Ambulance, community and others.
4.	Shelter arrangement for rescued people	Revenue Department, PWD and Urban & Rural Local bodies.
5.	Traffic control and diversion	Traffic Police, Home Guards, NCC, NSS and Volunteers.
6.	Cordoning off the disaster affected areas	Police, NCC, NSS, Home Guards and Volunteers.
7.	Law and Order maintenance	Revenue Department, Police and Home Guards.
8.	Search and Rescue operation	Fire and Rescue Services, Police, First Responders, and Volunteers etc.,
9.	Provision of First Aid / Trauma Management	Health Department, Local Bodies, Red Cross and Volunteers.
10.	Relief camps and basic amenities in shelters	Revenue Department, Urban & Rural Local bodies and Health Department.
11.	Identification of dead and injured	Revenue Department, Urban & Rural Local bodies and Health Department.
12.	Arrangement of medical support for casualties	Health Department and Urban & Rural Local bodies.
13.	Impact and Resource Assessment	Revenue Department, Urban & Rural Local bodies, Fire and Rescue and experts.
14.	Clearance of the disaster affected areas	Rural Development, PWD, Highways, Urban and Rural local bodies
15.	Prevention of epidemics & organizing health camps	Health Department and Urban & Rural local bodies.
16.	Need based establishment of Temporary shelters	Revenue Department, PWD, TANGEDCO and Urban & Rural Local bodies.
17.	Mobilizing Resources for relief and restoration	Revenue Department, PWD, Urban & Rural Local bodies, TANGEDCO and Civil Supplies.
18.	Clearance of debris / Solid waste	PWD, Highways Department and Urban & Rural local bodies.
19.	Restoration of communication and Road networks	PWD, High ways, Urban & Rural local bodies, TANGEDCO,
20.	Provision of water	TWAD and Urban & Local bodies.
21.	Resumption of transportation	RTO, TNSTC and Highways.
22.	Food Arrangements	Revenue Department, Urban & Rural Local bodies and Civil Supplies.
23.	Provision of relief supplies	Revenue Department, Urban & Rural Local bodies and Civil Supplies.
24.	Temporary mortuary / Dead Body disposal	Revenue Department, Urban & Rural Local bodies, Red Cross, NCC, NGOs and Health Departments.

DDMP Frame work Usages:-

At District level, the District Disaster Management Authority is already activated to mitigate any unexpected situation in the district. There are seven members included in this authority. The Institutional Frame work for Disaster Management has been developed at District and Taluk Level. Apart from Disaster Management Committee, each level has a Disaster Management Plan along with the various task forces like search and rescue, first aid, early warning, shelter management etc., The District Disaster Management Authority will be chaired by the District Collector where all line departments are its consultative members.

Approval Mechanism of DDMP: Authority for implementation

(State Level / District level orders):-

The District Disaster Management Plan prepared by obtaining suggestions from all department officers is approved by District Disaster Management Authority chaired by the District Collector. This plan after obtaining the State Disaster Management Authority's approval will be sent to all stake holders for effective implementation.

Plan review and updation: Periodicity

The District Disaster Management Plan is valid for one year and will be reviewed, updated and approved annually.

TARGETS OF DISTRICT DISASTER MANAGEMENT PLAN

“Sendai framework” is targeted about reduction of mortality rate, reduction in affected population, reduction in economic loss, reduction in damage of properties, enhancing international co-operation, strengthening of multi-hazard warning system and accessibility and availability of information to the people by 2030. Based on the “Sendai framework” Tiruchirappalli District has defined targets and listed below:-

Reduction of mortality rate by 2030

- Human loss during 2023-2024 is 4-Nos Tiruchirappalli district. Substantial measures are being taken to prevent human loss.

Reduce the number of the affected people by 2030

- ⁴ Effective implementation of the Disaster Risk Reduction enables reduction of the affected people by 2030

Reduce direct disaster economic loss in relation to global gross domestic product (GDP) by 2030

Huts damage for 2023-2024 is 88 and upto 31.3.2024. It will be reduced by 2024-30.

Reduce disaster damage to critical infrastructure and disruption of basic services among them health and educational facilities by 2030

Steps will be taken to reduce damage in critical infrastructures like health and educational facilities by 2030

Developing local Disaster Risk Strategy

Necessary steps have been taken and 154 lowlying areas have been earmarked in the District with past experience, to prevent flood / cyclone. Vigilent steps will be taken to avoid big investments in that areas and ensure resilient to disasters.

Enhance international cooperation

Necessary steps are being taken to utilize the traditional knowledge of the people and local technical to fight disasters. This will also be shared with State and Central government.

Increase the availability of and access to Multi hazard Early Warning Systems and disaster risk information and assessments to people by 2030

Emergency Operation Centre is established in Tiruchirappalli district. Updation of information, data are done in regular basis. People are accessing the information by using toll free no, 1077, 93840 56213. Steps have been taken to installation of Early warning system at 31 locations.

COVID 19 – Tiruchirappalli District

In Tiruchirappalli District, surveillance for COVID 19 had been started as early as in the month of January 2020. International passengers who came from China and other COVID affected Countries were screened at the Trichy International Airport (Entry Point) by a team of Health department officials from Public Health Department. The International passengers and their contacts kept under the surveillance for 14 days. An emergency operational centre (War Room) was established at the District Collectorate to address all sorts of grievances and queries related to COVID 19.

During nation wide lockdown period (last week of March 2020) the Public Health Department with the co-ordination of Police, Revenue and Other departments put on their combined efforts on implementing SOP measures.

The first COVID 19 positive case in the district was a native of Erode District. He was an international traveller and identified by our health team deputed at Trichy International Airport he and was admitted and successfully treated at Mahatma Gandhi Memorial Government Hospital, Tiruchirappalli. In During of June 2020, COVID 19 cases has began to rise and our battle with the COVID 19 had become more intensified. (Track, Test, Isolate was our strategical Plan) Surveillance was intensified, health teams were deputed at District Border Checkposts and at the Railway junction. Then list of travellers were communicated to the field officials and monitored for a period of 14 days.

The International passengers landed Trichy Airports were under gone compulsory quarantine. They were discharged only if, both entry & exit samples were found negative for COVID 19. The disinfection activities were carried out as a warfoot manner where the cases of

COVID-19 were identified. It has a vital role in controlling the spread of the disease.

COVID 19 positive cases primary contacts (home contacts) & extended contacts (Workplace & Other Contacts) has also been identified, tracked. It has helped us hugely to control the disease spread. Hot Spots and clusters were identified by Outreach Fever camps, Mobile Fever Clinics are also helped to control disease.

The role of Mahatma Gandhi Memorial Government Hospital during the pandemic was very patients referred from neighbouring districts also treated successfully by them In addition, Covid Health Centres & Covid Care Centers, the private hospitals & labs in the district also played a significant role in the battle against COVID 19.

During the second wave period Covid Care Centres & Covid Health Centres have been increased to handle the rising number of cases. Interim Covid Care Centres and Triaging Centres were also set up at block level for systematic Triaging & treatments. An Unified Command Centre (War Room) was set up at District Level to address the bed availability, Oxygen demand, insurance related queries and other grievances. Door to door “Syndromic Surveillance” was also initiated with the support of local bodies, other departments, NGOs and volunteers to identify and manage the suspected ILI cases.

The main weapon against the pandemic “COVID Vaccination” was started at Trichy District by Health Secretary on January 15th 2021.

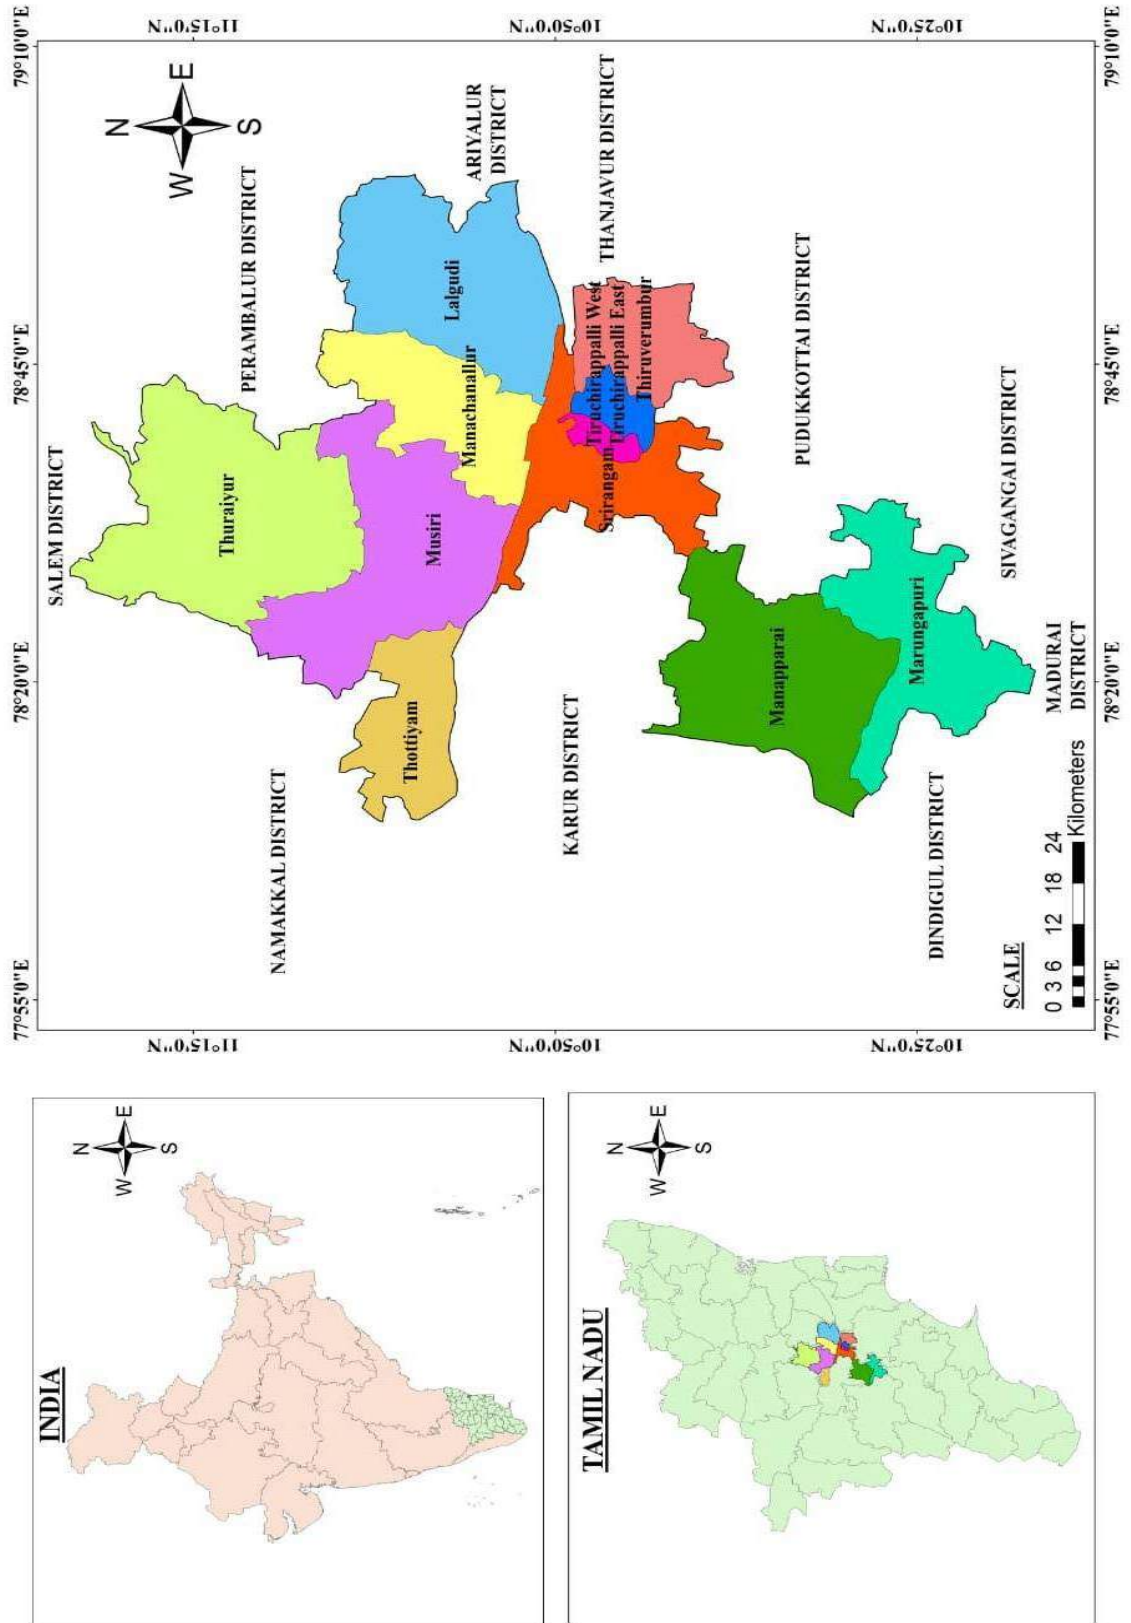

With a special focus given to vaccination to Mothers & Differently abled individuals, Trichy district stands one of the top districts in the COVID 19 Vaccination with the figure of around 24 lakh individuals vaccinated.

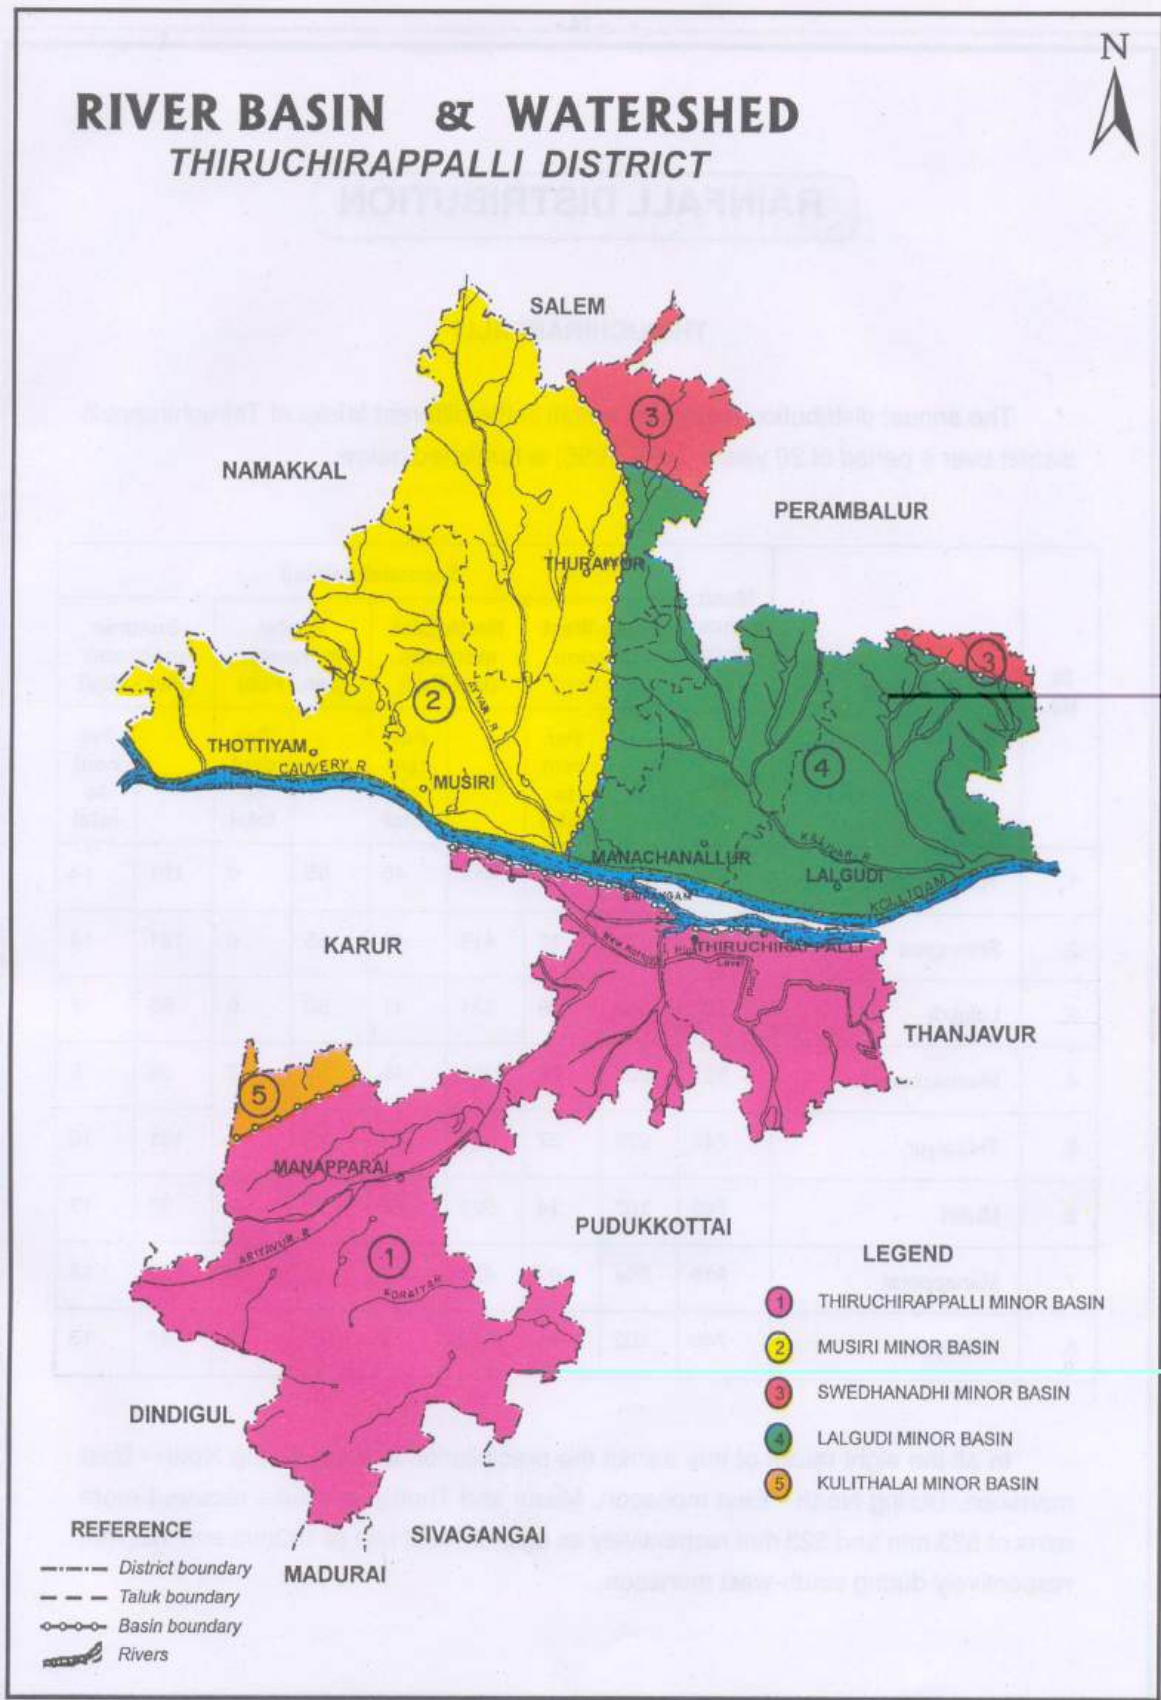

The battle against COVID 19, ends but, thousands of health care workers have contracted and suffered due to COVID 19, some lost their lives, some lost their dear ones in the battle.

4.a (i). Infrastructure:

There are no major dams in charge of the Executive Engineer (PWD) RC Division, Tiruchirappalli. But the following two bed regulators and one anicut are in charge of the Executive Engineer, RC Division, PWD, Tiruchirappalli.

1. Jedarpalayam Bed Regulator (Namakkal District)
2. Kattalai Bed Regulator (Karur District)
3. Upper Anicut

These three regulators are posted with sufficient staff to look after as follows:-

1. Jedarpalayam Bed Regulator - Assistant Executive Engineer, Velur, Namakkal Taluk
2. Kattalai Bed Regulator - Assistant Executive Engineer, Mayanur.
3. Upper Anicut - Assistant Executive Engineer, Vathalai.

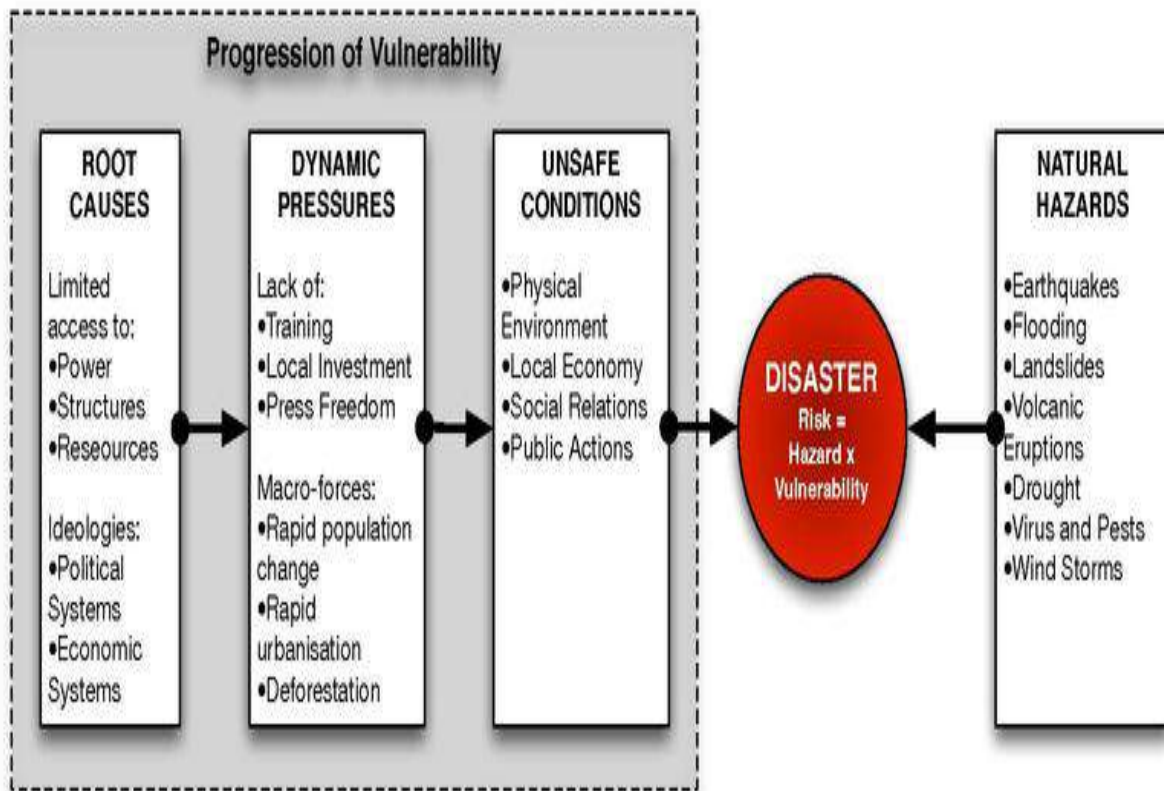

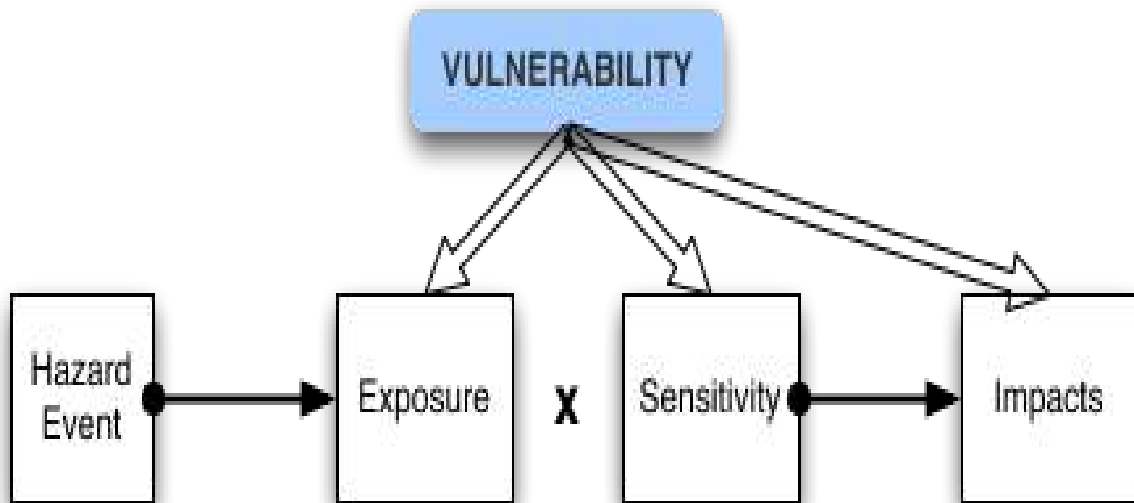

There are 174 tanks in Tiruchirappalli District, both system and non-system, under the control of Public Works Department, in Tiruchirappalli district. Repairs, if any, to these tanks have to be done. The Chief Engineer (Irrigation) will arrange for the supply of flood tools like spades for distribution among all Sub Divisions. The Chief Engineer (Irrigation) should ensure that at least 500 gunny bags, filled with sand to be kept ready in each storage point for easy transportation to the place of emergency.

4.a (ii)Vulnerable points

Heavy discharge in the River Cauvery and incessant rainfall in the catchment areas of rivers from neighbouring districts flowing through the city merge with Cauvery marooned hundreds of houses during the North East Monsoon 2005. Enormous flow in Ariyar in Dindugal district inundated parts of neighbouring in Dheeran Nagar and Piratiyur. Kudamurutti river that collect water from koraiyar in Pudukottai District and Ariyar flooded vayalur road neighboured hoods Ariyaru River breached the banks on Punganur, cuvery inundation Trihcy -Dindugal NH near Pirattiyur. From the past experiences the vulnerable points and vulnerable areas are identified and listed.

Classification of Vulnerable Areas - vide Chennai Principal Secretary / Commissioner of Revenue Administration, letter no. Lr.No.N.C.III (2)/384/2016, dated 04.11.2016

S.No	Earlier Nomenclature and its Criteria	Revised Nomenclature (No change in Criteria)
1.	<p><u>Highly Vulnerable:</u> An area can be classified as Highly Vulnerable if any of the following criteria is satisfied.</p> <ul style="list-style-type: none"> ➤ Inundation of water and water level was more than 5 feet due to heavy rains or discharge from water bodies. ➤ Rescue operations carried out with the help of Central forces/SDRF. ➤ Areas which are cut off and became inaccessible for undertaking rescue and relief operations. ➤ Loss of lives or large scale evacuation carried out. 	Very High vulnerability
2	<p><u>Vulnerable:</u> An area can be classified as Vulnerable if any of the following criteria is satisfied.</p> <ul style="list-style-type: none"> ➤ Inundation of water and water level was 3-5 feet. ➤ Rescue operations carried out only by local police or Fire services and local community. 	High vulnerability
3	<p><u>Moderately Vulnerable:</u> An area can be classified as Moderately Vulnerable if Inundation of Water & Water level was 2-3 feet.</p>	Medium vulnerability
4	<p><u>Low Vulnerable:</u> An area can be classified as Less Vulnerable if stagnation of water was below 2 feet.</p>	Low vulnerability

An Assessment of Flood Prone Zones – Tiruchirappalli District

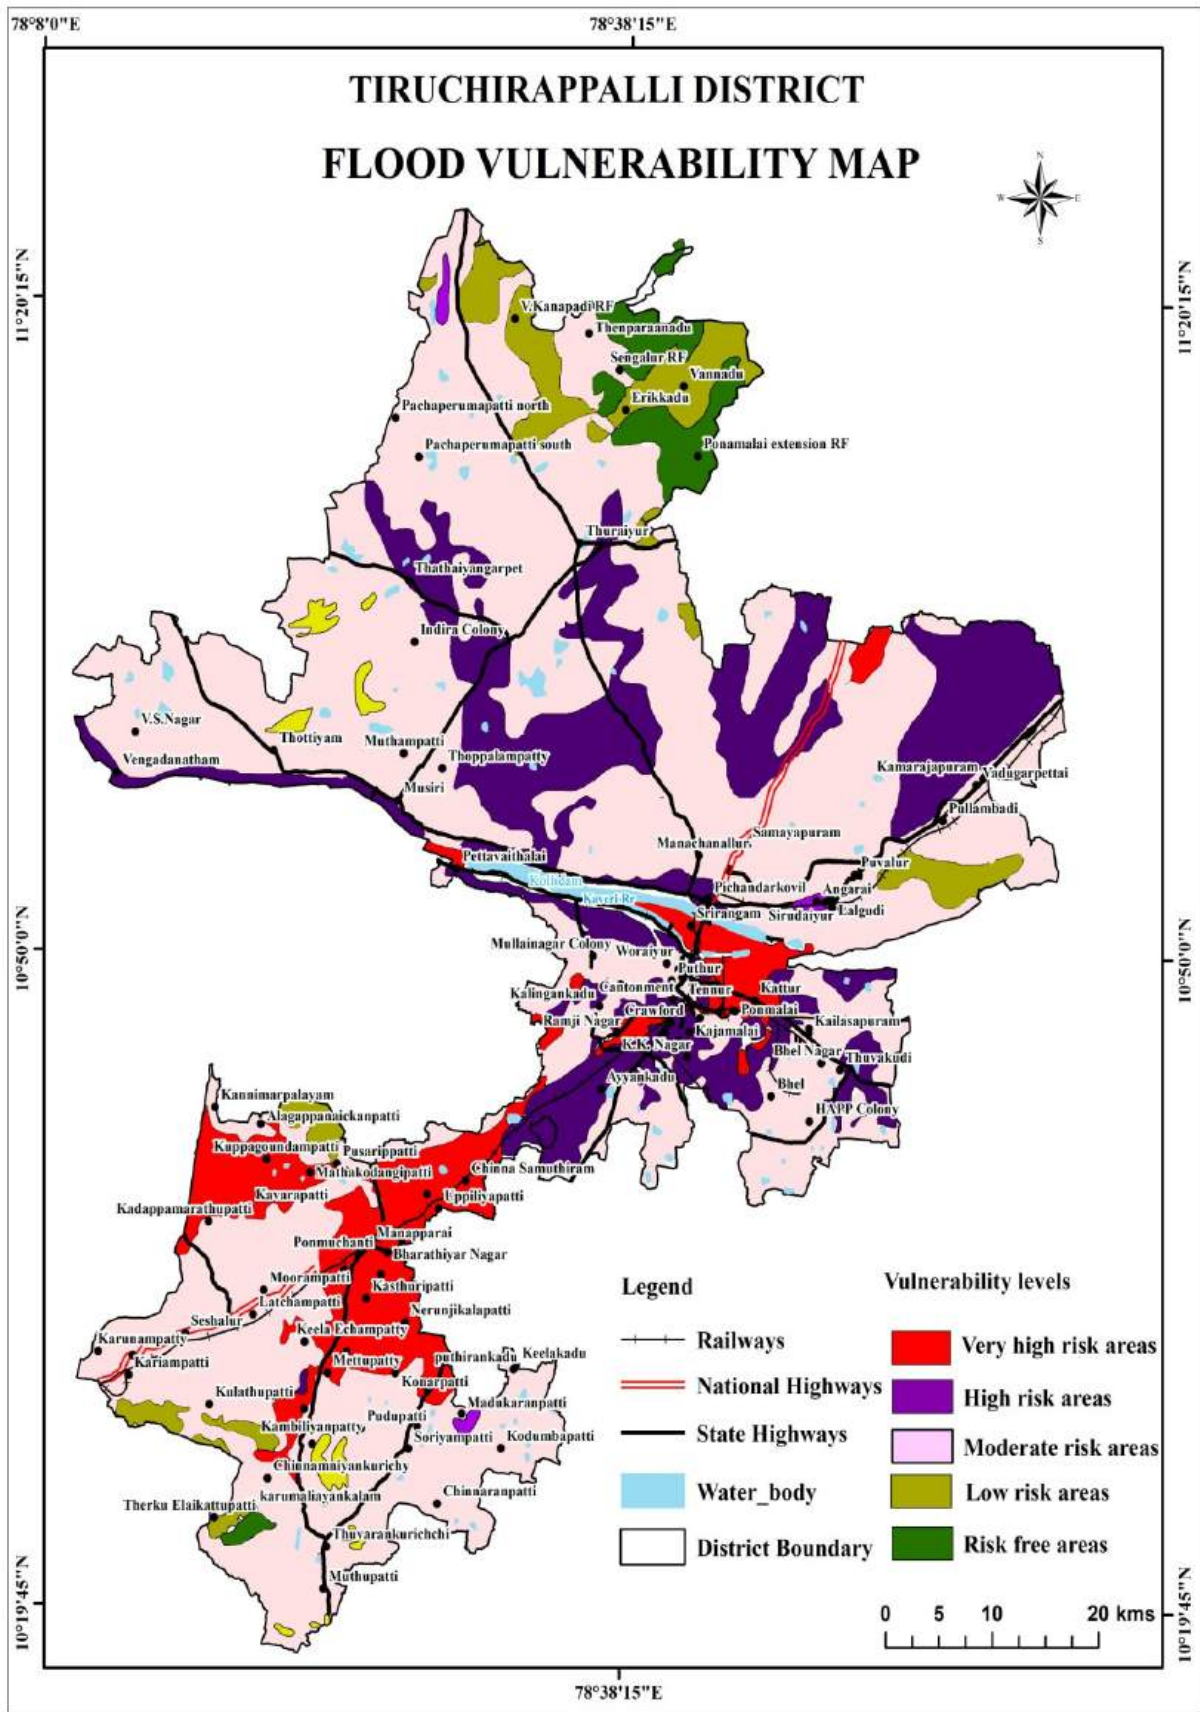

During the past 10 years Tiruchirappalli District has been affected mainly due to heavy downpour and unprecedented floods caused during the north east monsoon season. Such unpredictable scenario necessitated adequate preparedness. For such preparedness, it is essential to identify the flood vulnerable areas of the Trichirappalli district along with underlying causes.

A study with rapid advancements in the field of Geography and its GIS (Geographical Information System) technology have already been made by Department of Geography Periyar EVR College Trichy for identifying the flood vulnerable zones in Trichirappalli District.

Methodology Parameter Factor Loading

Five parameters such as rainfall(1), soils(2), geomorphology(3) , geology(4) and slope(5) were used to assess the vulnerability relevant to the flood factor with Arc GIS analyze tool

The results were grouped into five different levels of flood intensity classes such as very high risk zone, high risk zone, moderate risk zone, low risk zone and free from risk.

Map Compiled by PG & Research Department of Geography, Thanthai Periyar Government Arts & Science College- (Autonomous) Tiruchiappalli-620 023

Flood Vulnerable Zone Area Matrix For Tiruchirappalli District

S.No	Zone of influences	Area in Sq km	Area (Per cen)
1	Very High Risk Zone	373.10	8.47
2	High Risk Zone	974.67	22.13
3	Moderate Risk Zone	2793.78	63.43
4	Low Risk Zone	207.92	4.72
5	Free From Risk	54.57	1.23

Compiled by PG & Research Department of Geography, Thanthai Periyar Government Arts & Science College (Autonomous) Tiruchiapalli-620 023

Very high risk and high risk areas:

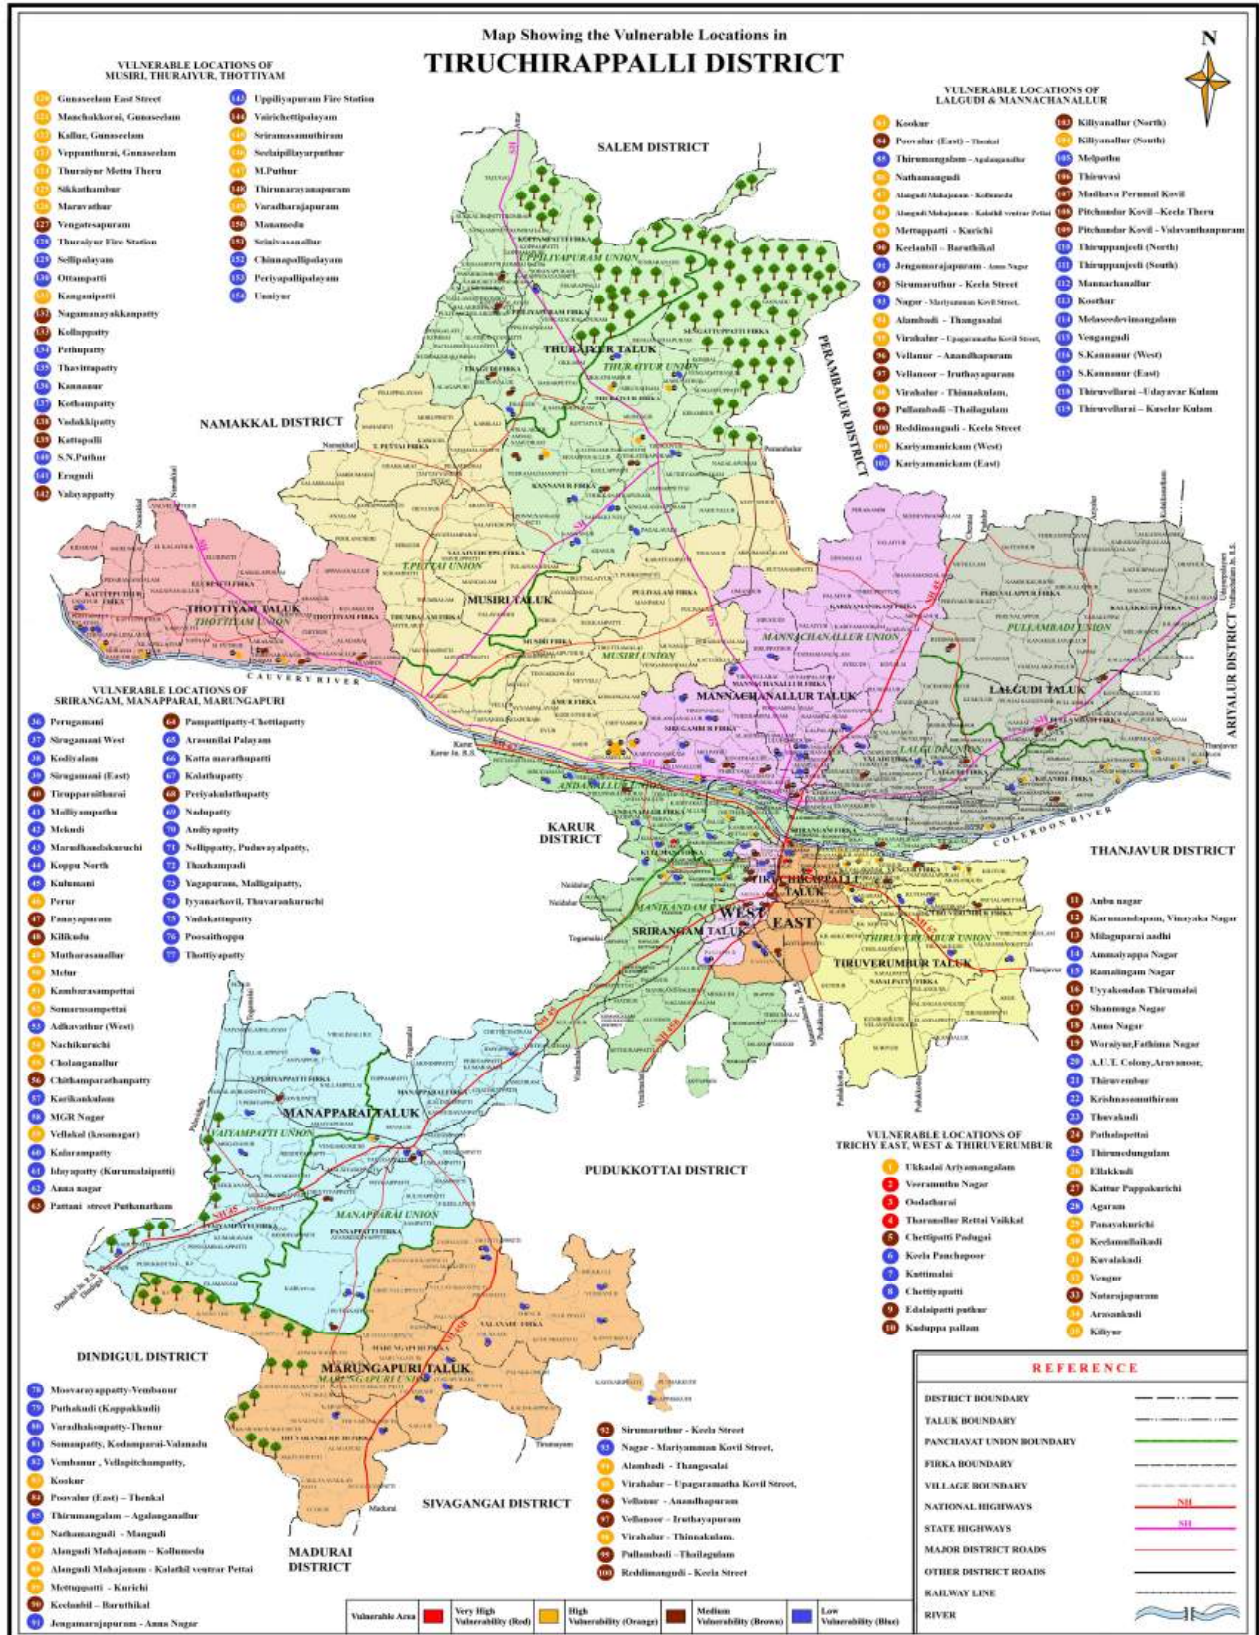

This zone is main problem during the flood of monsoon. Drainage congestion and bank erosion occur. This area covers 373.10 sq km (8.47 per cent of the district). This high vulnerable area are generally distributed along the Ayyar river and Pullambadi rivers in the northern part of the district in Manachanullur and some packets of Lalgudi Taluks. In southern parts of the district along Ponnaniyar and Koraiyar river valleies are very vulnerable in monsoon season. Sudden flash floods frequently occur due to heavy downpours and overflowing in the river tributaries.

Taluk wise a low lying areas are below.

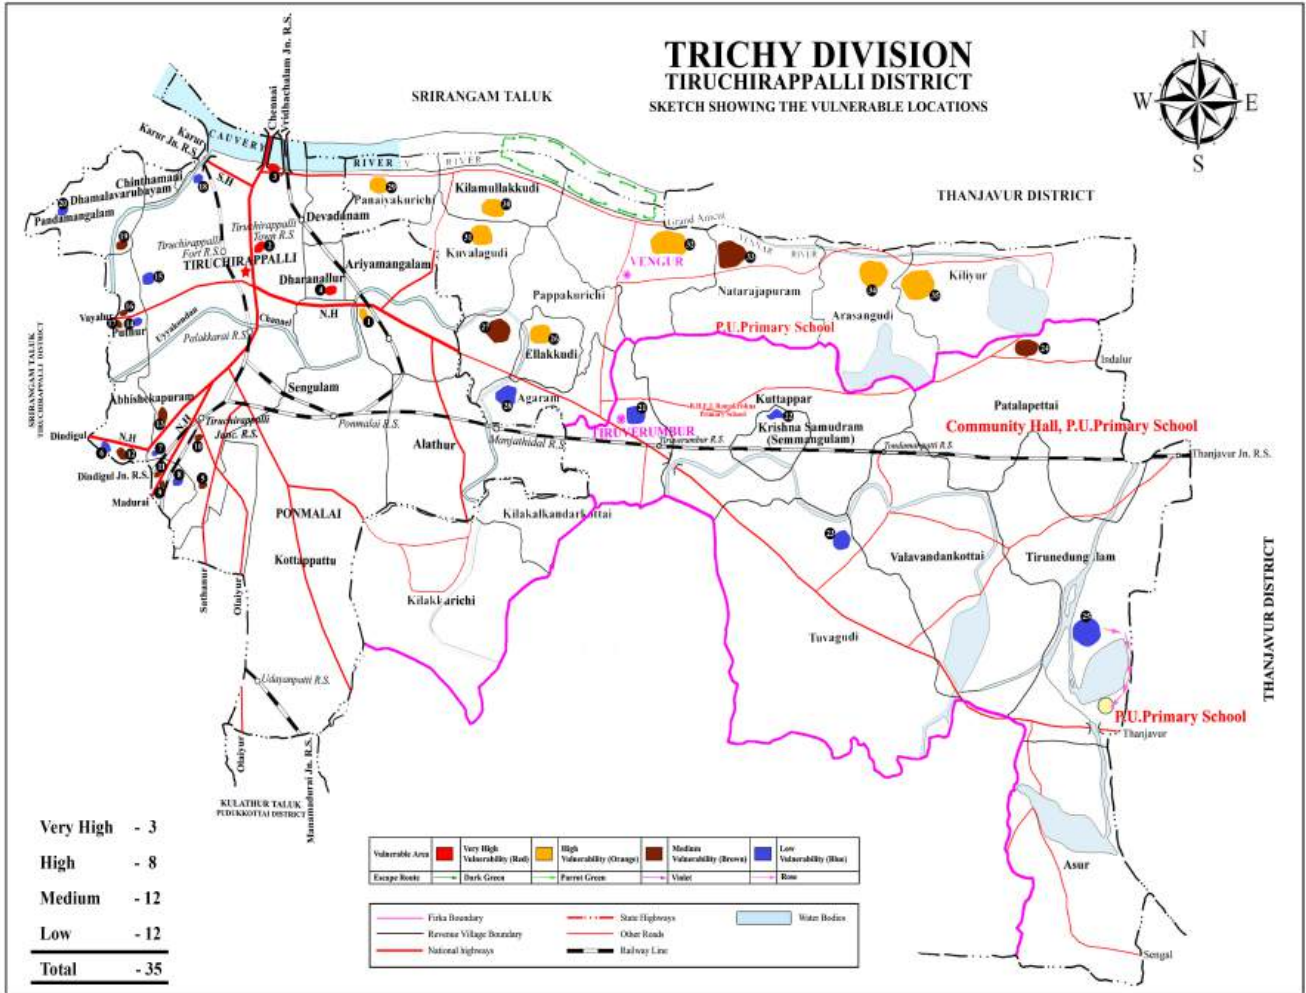

Sl. No	Name of the Taluk	Affected areas
1	Trichy west	Uyyakondan Thirumalai
2	Thiruverumbur	Kuvalakudi, Vengur, Charkarpalayam, Ottakudy, Keelamullaikudi, Valavanthankottai
3	Srirangam	Mallachipuram, Kambarasampettai, Murungapettai, Allur,
4	Lalgudi	Koohur, Ariyur
5	Manachanallur	Kariyamanickam, Sirugambur, Thiruvasi, Sanamangalam
5	Musiri	Gunaseelam
6	Thuraiyur	Murugur,
7	Thottiyam	Manmedu, Thirunarayanpuram, Alakarai

4.b(i). Socio-Economic profile of the District:

The major River is the River Cauvery and its tributary Kollidam. The important Channels across the city are Koraiyar, Uyyakondan and Kudamurutti.

Cauvery river bisecting Tiruchirappalli and Srirangam

The rivers Cauvery and Kollidam start branching out to form the Cauvery delta irrigating vast tracts of land in the district.

KALLANAI DAM (GRAND ANAICUT):-

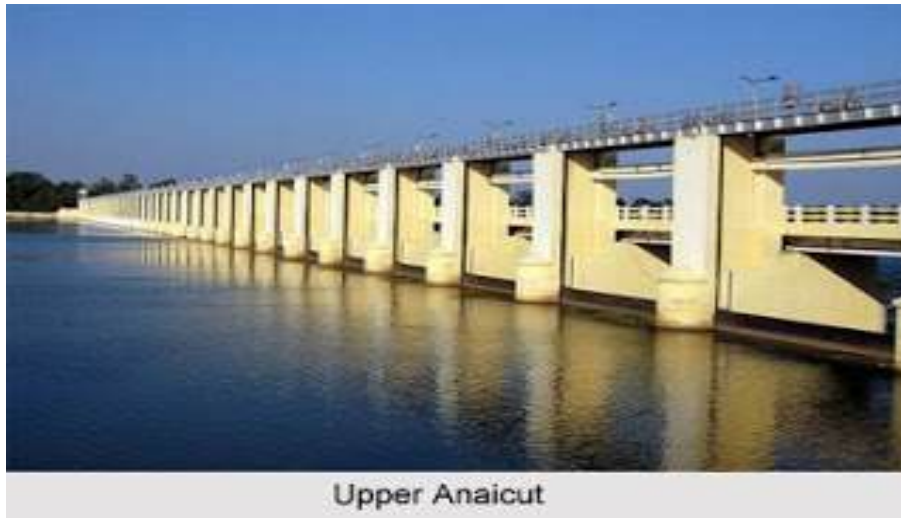

The “worlds oldest surviving Dam” the “kallanai” located 15 kms from Trichirappalli and 35 kms from Thanjavur, was built across the Cauvery river by Karikala Chola in the 2nd century A.D.,

Water from the dam distributed via 4 canals are used for irrigation in Cauvery Delta parts of the Tiruchirappalli and Tanjore Districts

The Cauvery River divides into two streams of Cauvery and Kollidam (Coleroon) at Mukkombu, 16 kms west of the city and the two streams and forms the rejoin at Kallanai (Grand Anaicut) and forms the island of Srirangam.

UPPER ANAICUT (MELANAI):-

This Dam is located in between Vaathalai-Mukkombu/Coleron, 18 kms from Tiruchirappalli Town.

The **Upper Anaicut** (alternatively **Upper Anicut**), also known as **Mukkombu** is a dam built on the Kaveri River. The 685 m long regulator dam was constructed between 1836 and 1838 by Sir Arthur Cotton, a British irrigation engineer who was inspired by the architectural beauty of Grand Anaicut which was built by Karikala Chola in the 2nd century.

Upper Anaicut or Mukkombu is about 18 kilometers (11 mi) west of Trichy and 2 kilometers away from Jeeyapuram at a point where River Kollidam branches out from the main river, Cauvery. It is a lovely picnic spot skirting acres of verdant greenery. The place also has several well-manicured gardens and park.

Ponnaniyar Dam

Ponnaniyaru dam is situated south of Tiruchirappalli. It is 24 kms from Manapparai and 9 kms from Vaiyampatti. Ponnaniyaru dam is built across Perumal malai and Chemmalai.

While the dam and its catchment area located in Karur district, the ayacut area of the dam has spread over Mugavanoor and neighbouring villages in Trichy district.

4.b(ii). Climate :

The climate is mostly dry and characterized by good rainfall. Tiruchirappalli district has dry weather throughout the year except during the monsoons. In March the temperature begins to rise, which persists till the end of June.

The highest temperatures are normally recorded during the month of May. This year it touched the peak of 43°C. The scanty showers during this period do not provide much relief from the oppressive heat. However, there is an improvement in the climate during the June – August period. During the pre-monsoon period, the temperature reverses its trend. By September the sky gets heavily overcast, although the rains pour down. The northeast monsoon sets in vigorously only during October–November, and by December the rains disappear, rendering the climate clear and cold.

CHAPTER – 5

Institutional Mechanism

Trigger mechanism and operational directions:-

The entire Disaster Management operations should be designed in such a way that, at all the levels, disaster control and mitigation operation starts immediately after the information of disaster striking the district is received. In other words the entire system at all the levels is self activated without requiring any directions from the district level authorities to act.

Trigger Mechanism:

The Trigger mechanism envisages that on receiving signals of a Disaster happening or likely to happen, all activities required for the mitigation process are energised and activated simultaneously without loss of time. The primary objective of the trigger mechanism is to undertake immediate rescue and relief operations and stabilise the mitigation process as quickly as possible.

The trigger mechanism in fact is a preparedness plan in which all the participating officers and agencies know in advance the task assigned to them and the manner in which they have to be prepared themselves to respond. The resources identified include manpower, material and equipment.

1.INFORMATION AND COMMUNICATIONS

As soon as the first flood or weather warning is received, it will be communicated to the respective Tahsildars by the Personal Assistant (General) to Collector, who is the Co-ordinating Officer at the district level.

The Tahsildar will issue a similar warning to the flood duty officials and alert them to be ready for initiating action. On receipt of second warning, the flood duty officers will proceed to various places of duty and report before the Zonal Officers in charge of the firkas.

On receipt of information of the impending disaster, the Firka Revenue Inspector will straight away commence rescue operations. He will immediately rush to the low-lying areas and evacuate the people to places of safety. In this connection, recourse should be to have a taluk map containing the list of relief centres in the area.

2.PREVENTIVE ACTION

The weak spots in the river bunds and tank bunds should be inspected immediately and breaches, if any found, closed with the help of the Village Administrative Officers, the Panchayat and the public.

3.MOBILISATION OF HELP

It is the duty of the Firka Revenue Inspector to mobilise the Village Administrative Officers to see that a careful watch is kept over the flood banks and to comply promptly with any requisition, for labour or materials. They should see that the Mazdoors, sent from the villages, take with them necessary bill hook, Spade and Iron pans. The Village Administrative Officer should keep a careful account of all materials recovered and for have receipts for having receipt of the materials from whom they are taken. If the size of breach is large, the Revenue Inspector should mobilise further help from the Block Development Officers, the Assistant Engineer of the PWD and Higher Officials from the Revenue Department. The breach should be closed with the sand bags already in store with the Block Deveopment Officer and by the Assistant Engineers, PWD.

COMMUNICATION MECHANISM

Uninterrupted maintenance of road communication / connectivity is an absolute necessity in times of floods and heavy rains. The Divisional Engineer (Highways & Rural Works), Tiruchirappalli and Pudukkottai should ensure that road communication is properly maintained. It should also be seen that wind-fallen trees or any obstruction on road are removed immediately. In addition to the existing system of maintenance, teams of road inspectors have to be formed to patrol the roads and clear the obstacles of the locality. They should be equipped with the tools necessary to remove the road blocks without loss of time.

EXECUTIVE ENGINEER, PWD, TIRUCHIRAPPALLI DIVISION

All the banks, anicuts, channels and rivers are generally in good condition. One Assistant Executive Engineer and three Section Officers will be alerted and important vulnerable points kept in watch by the field staff with instructions to face adverse situation if any.

The Officers of the Public Works Department and flood duty officials posted on duty in various vulnerable points should therefore be alert whenever there is heavy down pour of rain. A statement showing the jurisdiction of officers for attending to the patrolling of the Cauvery and Coleroon banks during high flood times should be issued E.E., PWD.

Substantial road breaches involving hindrance to traffic should be intimated to the District Collector. The important roads linking the adjacent district head-quarters namely Karur - Tiruchirappalli, Namakkal - Tiruchirappalli, Tiruchirappalli - Tholudur, Tiruchirappalli - Ariyalur and Tiruchirappalli - Pudukkottai & Viralimalai should be maintained properly so that there may not be any traffic bottleneck. If there is major breach in any of the main road involving traffic cut, wireless message should be conveyed to the Revenue Divisional Officer and District Collector, so that necessary restoration teams can be rushed to the spot.

The following tools at minimum number will be kept ready with each section attached to Highways and Rural Works Department, Public Works Department and each Panchayat Union for emergent use.

Spade 's	-	50 Nos.
Iron pans	-	12 Nos.
Cross bars	-	5 Nos.
Pick-axe	-	25 Nos.
Bill hook	-	15 Nos.

CHAPTER -06

Preparedness

The aims of Disaster preparedness are to minimise the adverse effects of a hazard through effective pre-cautionary actions, and to ensure timely, appropriate and efficient organisation and delivery of emergency response following the impact of disaster.

Sec.2(m) of the DM Act- “Preparedness means the state of readiness to deal with a threatening situation or disaster and the effects thereof. Disaster preparedness is the management planning for a prompt and efficient action to save lives, to reduce sufferings and to minimize damages to property. Before onset of monsoon of South west / North East, the DDMA- the Collector of the district will convene meeting of all departmental officials in the district, local authorities, NGOs, Rescue forces representatives such Army, Navy, Coast Guard etc. and impress upon them their role and responsibilities and keep themselves alert to meet any emergent situation due to disaster.

There are nine major components involved in Disaster Preparedness which provide a framework upon which a National disaster preparedness strategy can be developed (UNDP, DRM, 1991)

Response measures are those taken immediately after receiving early warning from the relevant authority or in anticipation of an impending disaster, or immediately after the occurrence of an event without any warning. The primary goal of response to a disaster is saving lives, protecting property, environment, and meeting basic needs of human and other living beings after the disaster. Its focus is on rescuing those affected and those likely to be affected by the disaster. The UNISDR defines response as “the provision of emergency services and public assistance during or immediately after a disaster in order to save lives, reduce health impacts, ensure public safety and meet the basic subsistence needs of the people affected.” Preparedness, is defined as “the knowledge and capacities developed by governments, professional response and recovery organizations, communities and individuals to effectively anticipate, respond to, and recover from, the impacts of likely, imminent or current hazard events or conditions.” Based on the

preparedness, the response process begins as soon as it becomes apparent that a disastrous event is imminent and lasts until the disaster is declared to be over. It is conducted during periods of high stress in highly time-constrained situations with limited information and resources. It is considered as the most visible phase amongst various phases of disaster management.

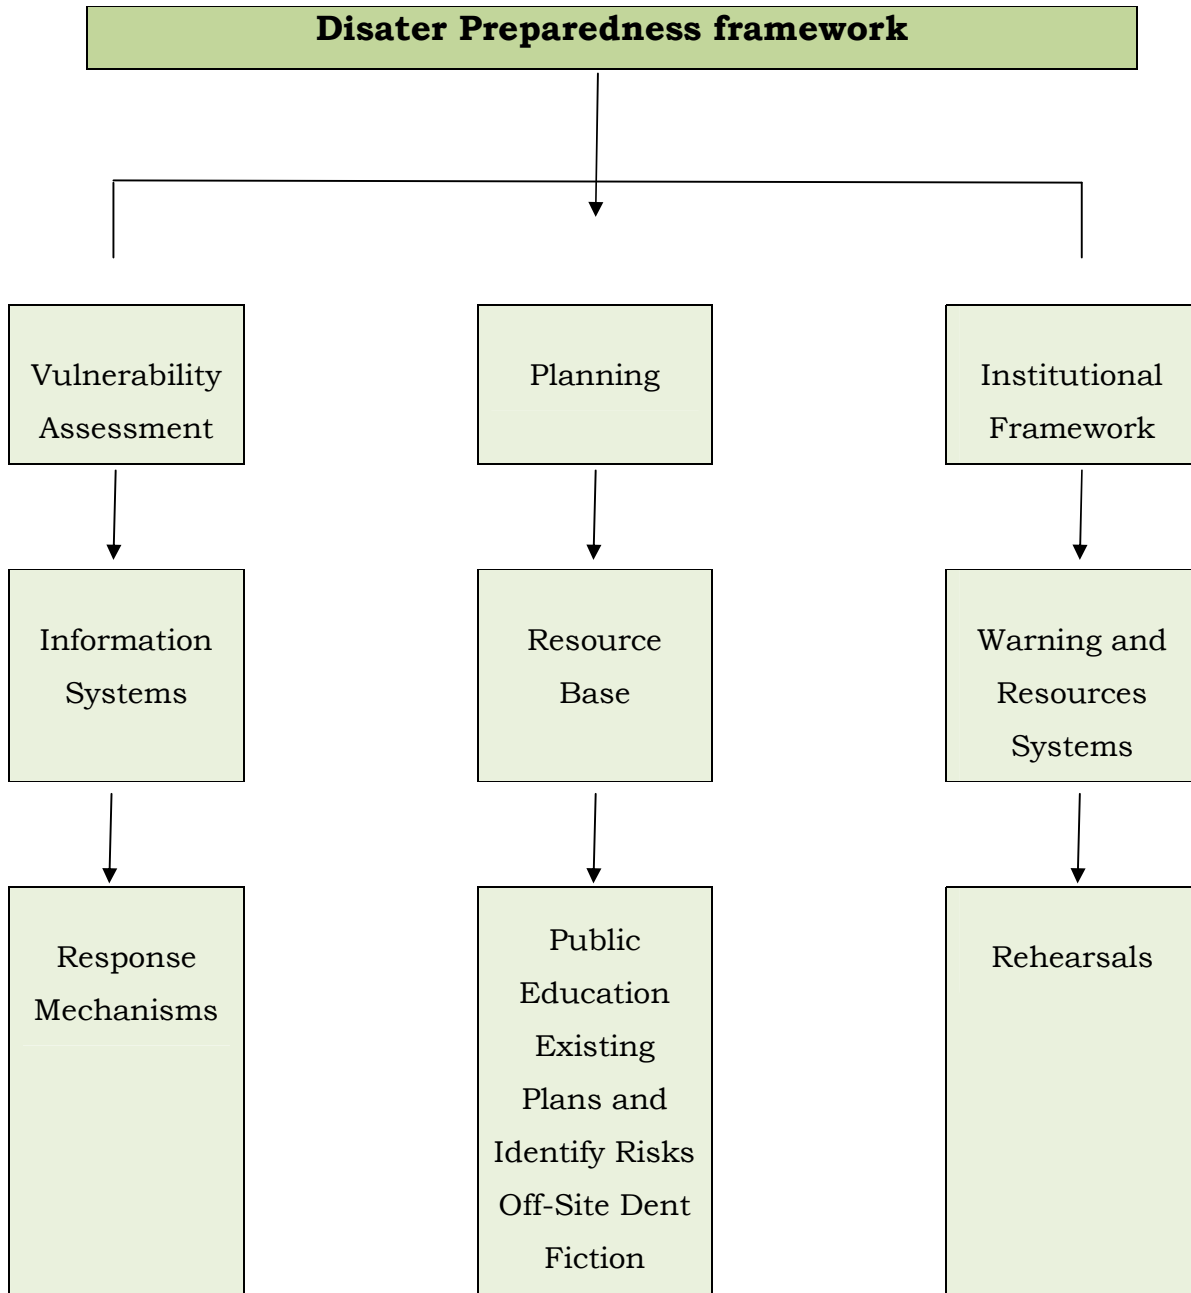

Response includes not only those activities that directly address the immediate needs, such as search and rescue, first aid and temporary shelters, but also rapid mobilization of various systems necessary to coordinate and support the efforts. For effective response, all the stakeholders need to have a clear vision about hazards, its consequences, clarity on plan of action and must be well versed with their roles and responsibilities.

The District Administration shall identify sites for establishment of various facilities as mentioned in the Incident Response System (IRS) guidelines such as Incident Command Post(ICP) relief camp, base, staging area, camp, and helipad, for providing various services during the response. The administration will widely disseminate and publicise information about these arrangements as mandated in the SDMP and DDMP. Since disaster response operations are multifaceted, time sensitive, extremely fast-moving, and mostly unpredictable, it requires rapid assessment, close coordination among several departments, quick decision- making, fast deployment of human resources and machinery as well as close monitoring. In order to prevent delays and to eliminate ambiguities with regard to chain of command, DDMP will clearly spell out the response organisation as per IRS. These plans will clearly identify the personnel to be deputed for various responsibilities in the Incident Response Team(IRT) at various levels of administration along with proper responsibility and accountability framework. Provision for implementation of unified command in case of involvement of multiple agencies such as Army, NDRF, CMPFs, and International Urban Teams Search and Rescue will be spelt out in the DDMP. From time to time, the Disaster Management plan will be tested and rehearsed by carrying out mock exercises.

Action plan for Priority Four – Responsibility matrix for disaster preparedness and Response

Action plan for priority – Responsibility matrix for disaster preparedness and Response

Major themes	2015-25	2026-30
<ul style="list-style-type: none"> ❖ People and Animals ❖ Search and Rescue ❖ Medical Care ❖ Drinking water/Dewatering pumps/sanitation facilities/public health ❖ Food and Essential Supply ❖ Communication ❖ Housing and temporary shelter ❖ Power ❖ Fuel ❖ Transport ❖ Relief Logistics and Supply Chain Management ❖ Disposal of animal carcasses ❖ Fodder for livestock in scarcity-hit areas ❖ Relief Employment ❖ Media Relations 	<ul style="list-style-type: none"> ❖ with the guidance of Office of PS/CRA, conducting regular meeting with all line departments for disaster preparedness and response 	<ul style="list-style-type: none"> ❖ With the guidance of Office of PS/CRA, conducting regular meeting with all line departments for disaster preparedness and response

CHAPTER -07**Prevention & Mitigation Plan (2015-2030)**

Sec.2 (i) of Disaster Management Act defines – Mitigation means “measures aimed at reducing the risk, impact or effects of a disaster or threatening disaster situation”.

Actions to prevent an emergency from happening or lessen the impact if it does happen are known as mitigation. This is the most crucial component in any disaster management exercise. It may be in the form of creating awareness, building long term or short term infrastructure in hazard zones, aid planning etc. Mitigation opportunities may arise anytime where the awareness of the disaster is high e.g disaster scare – however unfounded it seems, post disaster, during disaster or during such seasons in areas prone to disasters. Mitigation is one of the positive links between disasters and development. Agencies, Communities and individuals can use their development resources to reduce the risk of hazards through mitigation projects. Mitigation applies to a wide range of activities and protection measures that might be instigated from the physical, like constructing stronger buildings or agricultural diversification, to the procedural, like standard techniques for incorporating hazards assessment in land use planning. The aim of a mitigation strategy is to reduce losses in the event of a future occurrence of a hazard. Structural mitigation may comprise construction of individual disaster resistant structures like retrofitted or earthquake – resistant building or creation of structures whose function is primarily disaster protection like flood control structure, dykes, levees, infiltration dams etc.

Time of Mitigation: The risk measures of mitigation are often placed in the pre disaster time frame. In fact the most opportune time to implement mitigation is in the period after a disaster. Public awareness of the problems posed by hazards is high political will to act may also be at its peak.

Typical Strategies of Mitigation: Typical mitigation strategies are broadly involved in Structural and Non-Structural measure. The following activities are some of the important mitigation measures listed below:

- ❖ Land use regulations
- ❖ Up gradation of construction codes and building safety
- ❖ Emergency Planning
- ❖ Warning and prediction
- ❖ Information dissemination
- ❖ Risk mapping and Risk Analysis
- ❖ Education and training
- ❖ Insurance etc.

CHAPTER -08**Response plan – Including Incident Response System
(covering Rescue, Evacuation and Relief)**

Incident Response System is a mechanism which reduces adhocism in response through a well conceived team. It incorporates all the tasks that may need to be performed during the response. It identifies and pre-designates officers to perform various duties and get them trained in their roles. It is a flexible system and only those Sections/Branches may be activated in the team which is required to meet the disaster situation.

Incident Response team::

Sl.No	Department	Designation / Post
1	Revenue Department	Personal Assistant (General) to Collector
2	Police	Assistant Commissioner /DSP
3	Health	Assistant Director
4	PWD	Assistant Executive Engineer
5	Fire & Rescue Services	Divisional officer
6	Public Relation office	Public Relation officer
7	Development	Assistant Director

CHAPTER -09

Recovery and Reconstrucion Plan

The Disaster Management Act 2005 enjoins Central and state Governments to make provisions for the implementation of the disaster management plans. DM Act spell out the responsibilities of the Central, State, and Local Governments with respect to disaster management. The DM Act states that every Ministry or Department of the Government of India shall make provisions, in its annual budget, for funds for the purposes of carrying out the activities and programmes set out in its disaster management plan. Respective DM authorities must review and update their DM plans. Central Ministries and State Governments will integrate DRR into their development policy, planning and programming at all levels. They must adopt a holistic approach and build multi-stakeholder partnerships at all levels as appropriate, for the implementation within a span of five, ten, or fifteen years. The plan is highly ambitious and the complete implementation of all elements across the country may take a very long time. Nevertheless, both Central and State Governments have already made considerable progress and they are expected to make sincere efforts for the implementation of the DM plans.

Recovery and build back better

Globally, the approach towards post-disaster restoration and rehabilitation has shifted to one of betterment reconstruction. While disasters result in considerable disruption of normal life, enormous suffering, loss of lives and property, global efforts consider the

recovery, rehabilitation and reconstruction phase as an opportunity to “Build Back Better” (BBB) integrating disaster risk reduction into development measures, and making communities resilient to disasters. The Sendai Framework expects that after a disaster, the stakeholders will be prepared for BBB. Existing mechanisms may require strengthening in order to provide effective support and achieve better implementation. Disaster recovery tends to be very difficult and long-drawn out. The reconstruction will vary depending upon the actual disaster, location, pre-disaster conditions, and the potentialities that emerge at that point of time.

Disaster recovery process is not a set of orderly actions triggered by the impact of a disaster upon a community. It will consist of several related activities such as the following:

- ◆ Damage assessments
- ◆ Debris clearance, removal and its environmentally safe disposal
- ◆ Restoration and even upgrading utilities including communication networks
- ◆ Re-establishment of major transport linkages
- ◆ Temporary housing
- ◆ Detailed building inspections
- ◆ Redevelopment planning
- ◆ Environmental assessments
- ◆ Demolition
- ◆ Reconstruction
- ◆ Integrating DRR into various development initiatives
- ◆ Financial management
- ◆ Economic impact analyses

CHAPTER -10

Mainstreaming of Disaster Management in Developmental Plans

The main disasters affecting Tiruchirappalli District namely Floods and Drought have been taken in to account while formulating Development Plans. The occurrence of floods/drought is the main focus while implementing the following schemes:

G.O(Ms) No.50 (Industries Dept. Regarding desilting of Tanks)

Any person engaged in the making of pots or any registered Pottery Labourers Co-operative Society registered under the Tamil Nadu Co-operative Societies Act, 1983 (Tamil Nadu Act 30 of 1983) for making pots, the public for bonafide domestic purpose and the farmers for agriculture purpose be allowed to quarry clay, silt, savudu and gravel on free of charges from the beds of tanks, channels and reservoirs under the control of the Public Works Department or Rural Development and Panchayat Raj Department which are notified by the District Collector in the District Gazette.

Desilting:

There are 115 number of works have been identified for the the implementation of Desilting during the year 2024-25, and 410.590 km. length completed at the estimate amount of Rs.1692.710 Lakhs.

MGNREGA:

The MGNREGS in Rural areas work during 2024-2025 details below:

Name of the Scheme	Physical Progress					Financial Progress [Amount Rs. in lakhs]			
	Taken UP	Completed	Pending	Not Started	% of Completion	AS Amount	Expenditure	Balance	% of Expenditure
MGNREGS	4,231	305	3,926	2,344	7.21	12,222.04	676.99	11,545.05	5.54

Dry land farming

Dry farming or Dry Land Farming refers to an improved system of cultivation whereby maximum amount of water is conserved by soil and water management. It involves efficient system of soil and crop management in the regions of low land and uneven distributed rainfall.

ADB – Climate Change Adaptation Scheme:

Climate-sensitive domains: Adaptation is relevant for all climate-sensitive domains, including agriculture, forestry, water management, coastal protection, public health, and disaster prevention.

IAMWARM etc.,

It is with this back ground that the Irrigated Agriculture Modernisation and Water-Bodies Restoration and Management (IAMWARM) project is prepared.

Objective:

The Project Development Objectives is to improve irrigation service delivery and productivity of irrigated agriculture with effective integrated water resources management in a river basin / sub-basin frame work in Tamilnadu

CHAPTER -11

Community & other Stakeholder participation

❖ CBDRM

Community Based Disaster Risk Management (CBDRM) is a process, which leads to a locally appropriate and locally ‘owned’ strategy for Disaster Preparedness and Risk Reduction. RedR India’s course on Community Based Disaster Risk Management explores the different dimensions of the CBDRM approach and has been designed to improve the effectiveness of specialist and non-specialist professionals in disaster response, helping them to link the disasters with risk reduction and development in a sustainable manner. This course can be made modular to focus on different topics like Community Based disaster Preparedness (CBDP), Community Emergency Response Teams, Community Contingency Planning (CCP) and Organisational Level Disaster Preparedness (OLDP).

This course introduces the significance, nature and scope of community based disaster risk reduction and management, and further delves in to understanding the essentials of preparedness planning. Further, it explores the process of capacity and vulnerability analysis, participatory planning and risk assessment tools, predictability, forecasting and early warning systems, use of sphere standards in community based disaster preparedness, family level preparedness and relief and rescue, long term disaster mitigation and preparedness measures and asset building for the same. It also covers a community-based approach to project and programme planning for relief, recovery and resettlement.

First Responders (Volunteers)

The first responders/ volunteers have been identified for each area and given sufficient training by Fire and Rescue personnel in first aid, search and evacuation, removal of affected people to shelters etc.,

The list of first responders have been given in the Tiruchirappalli District web site, <http://tiruchirappalli.nic.in>

N.G.Os:

The list of N.G.O.s identified for engagement in relief and rescue operation are given in the following link. <http://tiruchirappalli.nic.in>

Red Cross :

The details of Red Cross for relief and rescue operations are given in Annexure XIII. The members of Red Cross are given in the following link. <http://tiruchirappalli.nic.in>

CHAPTER -12

Linkages / Co-ordination with other agencies for Disaster Management

Army Recruiting Office :

The Commanding Officer of Army at Tiruchirappalli has nominated one Officer for co-ordination of Relief and Rehabilitation Operations with the District Administration.

Station Commander,
Station Head Quarters, Cantonment
Tiruchirappalli.
Phone No:0431 – 2412254

NCC - Group commander

Col.Y.Vijayakumar

CHAPTER -14

Monitoring and Evaluation

- ❖ Additional Chief Secretary to Government and Tourism, Culture, and Religious Endowments Department, Chennai has conducted review meeting for Drinking water scarcity and Heat Wave with all line departments on 10.05.2024 and also inspected at various field works in Tiruchirappalli District.
- ❖ Co-ordination meeting on Preparedness for South West Monsoon-2024 with all line departments was conducted on 31.05.2024 by District Collector.
- ❖ Tamil Nadu Risk reduction Agency with Anna University (Institute of Remote sensing) has organised one day Workshop on “Tamilnadu State Data Base for Emergency Management (TNSDEM)” with DM Cell staffs and 2 Engineers held on 23-7-2024.
- ❖ Co-ordination meeting on Preparedness for North East Monsoon-2024 with all line departments was conducted on 20.09.2024 by District Collector.

CHAPTER -15

RISK COMMUNICATION STRATEGIES

Telecommunications:

The important telephone numbers from District Collector to Revenue and Rural Development field staff have been updated, who are responsible for first response, search and rescue operations, shelter management etc.,

VHF Sets:

VHF Sets have been provided to all Revenue Divisional Officers and Tahsildars with Base station and Mobile stations at their vehicles for effective communication during emergency. In G.o.No.89 Revenue and Disaster Management Department, Dated:08.03.2024 The Government has Sanctioned **Rs.16,40,926.20/-** funds for upgradation of analog VHF repeaters to Analog cum Digital repeaters. The upgradation work is entrusted to DRDA.

Wireless POS instruments:

Wireless POS instruments have been provided to District Collector, District Revenue Officer, Personal Assistant (General), 4 Revenue Divisional Officers, 11 Tahsildars, 14 Block Development Officers and to District Emergency Operation Centre (DEOC) for effective communication during COVID and monsoon period.

Media:

The important phone numbers of All India Radio, private newspapers are listed in **Annexure-XV**.

Risk Communication Strategies (Telecommunication/VHF/Media/CDRRP ect.,

1. Mass Education and Public Awareness.
2. Training of industrial personnel
3. Appraisal of Government Authorities
4. Information to Media
5. Use of Wireless set
6. Use of Telephones, Cell phones
7. Use of Internet including e-mail.

Functioning of VHF/HF Sets :

Name of the Taluk	No.of Mobile Stations	No.of VHF/HF Base Stations

CHAPTER -17

Do's and Don'ts during all possible Hazards

- **Flood,**
- **Fire,**
- **Earthquake**
- **Cyclone**
- **Heat Wave**

(i) Flood

DO's:

1. Switch off electrical and gas appliances, and turn off services off at the mains.
2. Carry your emergency kit and let your friends and family know where you are going.
3. Avoid contact with flood water it may be contaminated with sewage,oil, chemicals or other substances.
4. If you have to walk in standing water, use a pole or stick to ensure that you do not step into deep water, open manholes or ditches.
5. Stay away from power lines electrical current can travel through water, Report power lines that are down to the power company.
6. Look before you step-after a flood, the ground and floors are covered with debris, which may include broken bottles, sharp objects, nails etc.Floors and stairs covered with mud and debris can be slippery.
7. Listen to the radio or television for updates and information.
8. If the ceiling is wet shut off electricity. Place a bucket underneath the spot and poke a small hole into the ceiling to relieve the pressure.
9. Use buckets,clean towels and mops to remove as much of the water from the afflicted rooms as possible.
10. Place sheets of aluminium foil between furniture wet carpet.

Don't's:

1. Don't walk through flowing water – currents can be deceptive, and shallow, fast moving water can knock you off your feet.
2. Don't swim through fast flowing water – you may get swept away or struck by an object in the water.
3. Don't drive through a flooded area – You may not be able to see abrupt drop – offs and only half a meter of flood water can carry a car away. Driving through flood water can also cause additional damage to nearby property.
4. Don't eat any food that has come into contact with flood water.
5. Don't reconnect your power supply until a qualified engineer has checked it. Be alert for gas leaks – do not smoke or use candles, lanterns, or open flames.
6. Don't scrub or brush mud and other deposits from materials, This may cause further damage.
7. Never turn on ceiling fixtures if ceiling is wet. Stay away from ceilings those are sagging.
8. Never use TVs, VCRS, CRT terminals or other electrical equipment while standing on wet floors, especially concrete.
9. Don't attempt to remove standing water using your vacuum cleaner.
10. Don't remove standing water in a basement too fast. If the pressure is relieved too quickly it may put undue stress on the walls.

Fire ::

1. Do not panic, evacuate calmly and quickly perpendicular to wind direction through the designated escape route
2. Keep a wet handkerchief or piece of cloth/ sari on face during evacuation
3. Keep the sick, elderly, weak, handicapped and other people who are unable to evacuate inside house and close all the doors and windows tightly.
4. Do not consume the uncovered food/ water etc open to the air, drink only from bottle

5. Change into fresh clothing after reaching safe place/ shelter, and wash hands properly
6. Inform Fire & Emergency Services, Police and medical services from safe location by calling 101, 100 and 108 respectively.
7. Listen to PA (Public Addressal) System of the plant/ factory, local radio/ TV channels for advice from district administration/fire/health/police and other concerned authorities
8. Provide correct and accurate information to government official.
9. Inform others on occurrence of event at public gathering places (like school, shopping centre, theatre etc.).
10. Don't pay attention to the rumours and don't spread rumours.

General Precautions During Normal Time

1. Do not smoke, lit fire or spark in the identified hazardous area
2. Sensitize the community living near the industrial units and they should be more vigilant about the nature of industrial units and associated risks.
3. Keep the contact numbers of nearest hazardous industry, fire station, police station, control room, health services and district control room, for emergency use.
4. Avoid housing near the industries producing or processing the hazardous chemicals, if possible.
5. Participate in all the capacity building programmes organized by the government/ voluntary organizations / industrial units.
6. Take part in preparing disaster management plan for the community and identify safe shelter along with safe and easy access routes.
7. Prepare a family disaster management plan and explain it to all the family members.
8. Make the family/neighbours aware of the basic characteristics of various poisonous/ hazardous chemicals and the first aid required to treat them.
9. Adequate number of personal protective equipments needs to be made available, to deal with emergency situation.

10. Prepare an emergency kit of items and essentials in the house, including medicines, documents and valuables.

Earthquake::

What to Do During an Earthquake

Stay as safe as possible during an earthquake. Be aware that some earthquakes are actually foreshocks and a larger earthquake might occur. Minimize your movements to a few steps that reach a nearby safe place and stay indoors until the shaking has stopped and you are sure exiting is safe.

If indoors

- DROP to the ground; take COVER by getting under a sturdy table or other piece of furniture; and HOLD ON until the shaking stops. If there is no a table or desk near you, cover your face and head with your arms and crouch in an inside corner of the building.
- Protect yourself by staying under the lintel of an inner door, in the corner of a room, under a table or even under a bed.
- Stay away from glass, windows, outside doors and walls, and anything that could fall, (such as lighting fixtures or furniture).
- Stay in bed if you are there when the earthquake strikes. Hold on and protect your head with a pillow, unless you are under a heavy light fixture that could fall. In that case, move to the nearest safe place.
- Use a doorway for shelter only if it is in close proximity to you and if you know it is a strongly supported, load bearing doorway.
- Stay inside until the shaking stops and it is safe to go outside. Research has shown that most injuries occur when people inside buildings attempt to move to a different location inside the building or try to leave.
- Be aware that the electricity may go out or the sprinkler systems or fire alarms may turn on.
- If outdoors
- Do not move from where you are. However, move away from buildings, trees, streetlights, and utility wires.
- If you are in open space, stay there until the shaking stops. The greatest danger exists directly outside buildings; at exits; and alongside exterior

walls. Most earthquake-related casualties result from collapsing walls, flying glass, and falling objects.

- If in a moving vehicle
- Stop as quickly as safety permits and stay in the vehicle. Avoid stopping near or under buildings, trees, overpasses, and utility wires.
- Proceed cautiously once the earthquake has stopped. Avoid roads, bridges, or ramps that might have been damaged by the earthquake.
- If trapped under debris
- Do not light a match.
- Do not move about or kick up dust.
- Cover your mouth with a handkerchief or clothing.
- Tap on a pipe or wall so rescuers can locate you. Use a whistle if one is available. Shout only as a last resort. Shouting can cause you to inhale dangerous amounts of dust.

Cyclone::

Do's

- Check houses, secure loose tiles by cementing wherever necessary, repair doors and windows.
- Check the area around the house. Remove dead or dying trees, anchor removable objects like lumber piles, loose bricks, garbage cans, sign-boards, loose zinc sheets etc.
- Keep some wooden boards ready so that glass windows can be boarded.
- If you do not have wooden boards handy, paste paper strips on glasses to prevent splinters flying into the house.
- Keep a hurricane Lantern filled with kerosene, flash light and enough dry cells and keep them handy.
- Promptly demolish condemned buildings.
- Those who have radio sets should ensure that the radio is fully serviceable. In the case of transistors an extra set of batteries should be kept handy.
- Keep your radio on and listen to latest weather warnings and advisories from the nearest AIR station. Pass the information to others.
- Pass only the official information you have got from the radio to others.

- Get away from low lying beaches or other locations which may be swept by high tides or storm waves. Leave sufficiently early before your way to high ground gets flooded. Do not delay and run the risk of being marooned.
- If your house is out of danger from high tides and flooding from the river, and it is well built, it is then probably the best place. However, please act promptly if asked to evacuate.
- Be alert for high water in areas where streams of rivers may flood due to heavy rains.
- Get extra food, especially things which can be eaten without cooking or with very little preparation. Store extra drinking water in suitably covered vessel.
- If you are in one of the evacuation areas, move your valuable articles to upper floors to minimise flood damage
- Check on everything that might blow away or be torn loose. Kerosene tins, cans, agricultural implements, garden tools, road signs and other objects become weapon of destruction in strong winds. Remove them and store them in a covered room.
- Be sure that a window or door can be opened on the lee side of the house i.e. the side opposite the one facing the wind.
- Make provisions for children and adults requiring special diets.

Don'ts::

- Avoid being misled by rumours.
- Don't leave shelters until informed by the rescue personals.
- Don't leave the safer place during lull, however minor repairs can be carried out.
- Don't touch the loose and dangling wire from lamp post, it may have electric current.

Heat Wave::

Heat Wave conditions can result in physiological strain, which could even result in death. To minimise the impact during the heat wave and to prevent serious ailment or death because of heat stroke, you can take the following measures:

- Avoid going out in the sun, especially between 12.00 noon and 3.00 p.m.
- Drink sufficient water and as often as possible, even if not thirsty
- Wear lightweight, light-coloured, loose, and porous cotton clothes. Use protective goggles, umbrella/hat, shoes or chappals while going out in sun.
- Avoid strenuous activities when the outside temperature is high. Avoid working outside between 12 noon and 3 p.m.
- While travelling, carry water with you.
- Avoid alcohol, tea, coffee and carbonated soft drinks, which dehydrates the body.
- Avoid high-protein food and do not eat stale food.
- If you work outside, use a hat or an umbrella and also use a damp cloth on your head, neck, face and limbs
- Do not leave children or pets in parked vehicles
- If you feel faint or ill, see a doctor immediately.
- Use ORS, homemade drinks like lassi, torani (rice water), lemon water, buttermilk, etc. which helps to re-hydrate the body.
- Keep animals in shade and give them plenty of water to drink.
- Keep your home cool, use curtains, shutters or sunshade and open windows at night.
- Use fans, damp clothing and take bath in cold water frequently.

CHAPTER -18

Important Government Orders

Sl. NO.	G.O and Date	Deetails
1	G.O.Ms.No.153 dt. 26.03.1999	Enhancement of Financial powers to Revenue Divisional Officers and the Principal Commissioner and Commissioner of Revenue Administration Grant of relief to the victims.
2	Lr.No.MCI(2) 43970/99 dt. 09.08.1999	Natural Calamities- precautionary measures to be taken- instructions issued.
	G.O.Ms.No.181 dt. 28.03.1998	Natural Calamities- Flood Relief- Hevay rain and flood during March 2008- Enhancement of Relief assistance- orders- issued.
4	G.O.Ms. No.678 dt. 29.11.2008	Natural Calamities – North-East Monsoon – Floods due to heavy rain and cyclone in Tamil Nadu – Damages caused – Relief package of assistance – Additional relief of 10kg of rice for the affected families under Calamity Relief Fund – Orders issued.
5.	G.O.Ms.No.682 dt. 01.12.2008	Natural Calamities – North East Monsoon, 2008 – Floods due to heavy rain and cyclone in Tamil Nadu – Damages caused in the Districts of Cuddalore, Nagapattinam, Tiruvarur, Thanjavur, Ramanathapuram, Pudukottai, Tiruchirapalli, Ariyalur, Perambalur, Kancheepuram and Tiruvallur – Relief assistance sanctioned from Calamity Relief Fund – Orders – Issued.
6	G.O.Ms.No.688 dt. 03.12.2008	Natural Calamities – North East Monsoon, 2008 – Floods due to heavy rain and cyclone ‘NISHA’ in Tamil Nadu – Damages caused to crops and loss of Cattle – Additional Relief under Calamity Relief Fund – Orders issued.
7.	G.O.Ms.No. 19 dt. 13.01.2009	Natural Calamities – North East Monsoon 2008 – Damages Caused due to cyclone “NISHA” and heavy rains in many districts in November 2008 - Sanction of additional sum of Rs.87.85 crores towards relief assistance for crop loss – Orders – Issued.
8.	G.O.Ms.No. 115 dt. 10.03.2010	Natural Calamities – Grant of financial assistance to the victims of Natural Calamities- Enhancement of relief from Rs.25,000/- to Rs.35,000/- for repair/ restoration of fully damaged/ destroyed pucca houses- Revised items and norms of Assistance from the Calamity Relief fund/ National Calamity contingency fund for the period between 2005-2010- Amendement- Issued.
9	NC.I(2) 5044/98 dt. 16.10.1998	Natrual Calamities-Drawing amount under TR 27 restraining Tahsildar and Revenue Divisional Officers from sanctioning relief under TR 27 nstructions-Issued.

10.	G.O.Ms.No.380 Dt:25.10.2012	இயற்கை இடர்பாடுகள் - வடகிழக்குப் பருவமழை 2012 - தமிழகத்தில் இயற்கை சீற்றத்தின் காரணமாக உயிரிழந்த, வீடுகளையும் உடைமைகளையும் இழந்த குடும்பங்களுக்கு நிவாரணம் வழங்குதல் - ஆணை வெளியிடப்படுகிறது.
11.	G.O.Ms.No.380, Dt:27.10.2015 (Revised)	இயற்கை இடர்பாடுகள் - வடகிழக்குப் பருவமழை 2015 - தமிழகத்தில் இயற்கை சீற்றத்தின் காரணமாக உயிரிழந்த, வீடுகளையும் உடைமைகளையும் இழந்த குடும்பங்களுக்கு நிவாரணம் வழங்குதல் - ஆணை வெளியிடப்படுகிறது.
12.	G.O.Ms.No.246, Dt:03.08.2017	”இயற்கை சீற்றங்களான புயல், வெள்ளம், வறட்சி, நிலநடுக்கம், தீ, சுனாமி மற்றும் ஆலங்கட்டி மழை ஆகியவற்றால் உயிரிழந்தவர்களின் குடும்பங்களுக்கு மாநில பேரிடர் நிவாரண நிதியிலிருந்து வழங்கப்பட்டு வரும் நிவாரண உதவிகளை நீட்டித்து கடல் அரிப்பு, இடி, மின்னல், சுழற்காற்று மற்றும் சூறைக்காற்று ஆகியவற்றினால் ஏற்படும் உயிரிழப்புகளுக்கும் இனிவரும் காலங்களில் மாநில பேரிடர் நிவாரண நிதியிலிருந்து நிவாரணம் வழங்கப்படும்” — ஆணை வெளியிடப்படுகிறது.
13.	G.O.Ms.No.172, Dt:25.03.2020	Disaster Management - corona virus Disease (COVID-19) - Infection Prevention and control - The Disaster Management Act, 2005 - Orders – Issued.
14.	G.O.Ms.No.92, Dt:28.02.2022	Disaster Management Act, 2005 - Constitution of State Disaster Mitigation Fund(SDMF) under the section 48(1) (c) of Disaster Management Act, 2005 - Guidelines - Orders - Issued.
15.	G.O.Ms.No.579 Dt: 09.12.2023	Disaster Management - Grant of Financial Assitance to the victims of Natural Calamities namely Cyclone, Flood, Drought, Earthquake, Fire, Tsunami and Hailstorm, Sea Erosion, Lightning, Thunder, Whirl wind, Gale wind & Pest attach in severe nature from the state Disaster Response Fund(SDRF) and the National Disaster Response Fund (NDRF) - Revised Norms of Government of India- Adopted - Orders - Issued.
16.	G.O.Ms.No.420 Dated:08.03.2024	Disaster Management - Annoncement made by the Hon`ble Minister for Reveneu and Disaster Management Establishment of 1400 Automatic Rain Guages and 100 Automatic Weather Stations ans taking over of 285 Auromatic weather Station from Agriculture Departmetn ANAU- Orders - Issued.
17.	G.o.No.89 Dated:08.03.2024	Disaster Management - VHF Sets have been provided to all Revenue Divisional Officers and Tahsildars with Base station and Mobile stations at their vehicles for effective communication during emergency. In The Government has Sanctioned Rs.16,40,926.20/- funds for upgradation of analog VHF repeaters to Analog cum Digital repeaters - Orders - Issued.

RIVERS FLOWING THROUGH THE ARIYAR BASIN DIVISION

Ariyar Basin sub divisions at Manaparai and Tiruchirapalli are at the southern side of river Cauvery and the catchments of these two sub divisions contribute to the flooding of Tiruchirapalli town and they empty into river Cauvery. The catchment of Ariyar Basin sub division of Thuraiyur is at the Northern side of river Cauvey and the flow that generates from the catchment falls in Coleroon and not a threat to the Tiruchirapalli city.

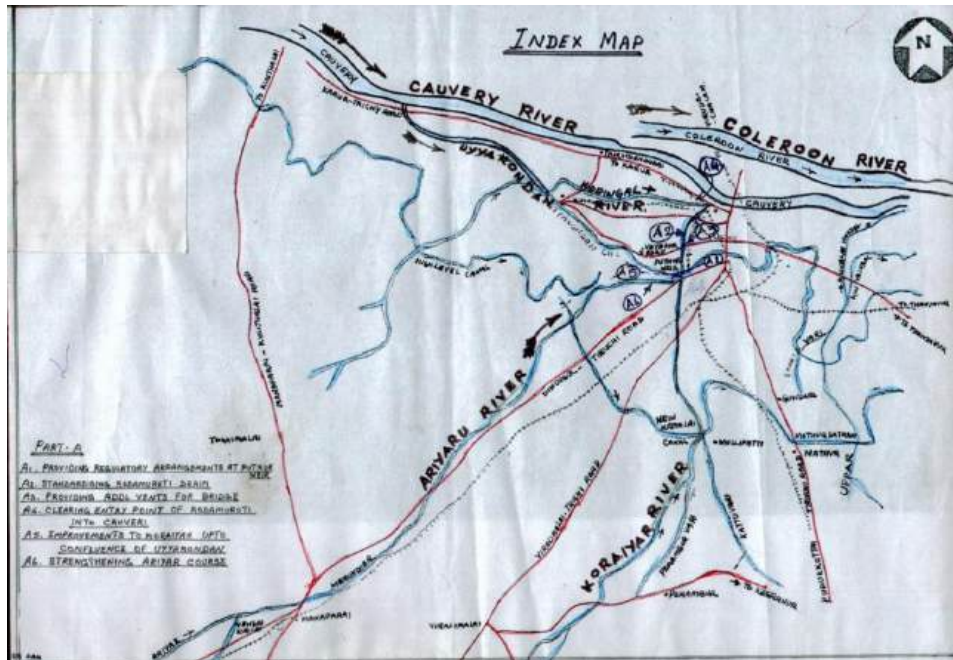

Main Rivers running in the division jurisdiction are:

Ariyar River

- Originates from Pallivellimukku in Manaparai Taluk of Trichy District, traverses Manaparai Taluk and enters Sri Rangam Taluk and confluences with Koraiyar River in the upstream of Puthur weir.
- The length of the river is 22 kms.
- There are 23 anicuts across this river and its tributaries and Ponnaniar river is a tributary of Ariyar and a reservoir by name Ponnaniar is across this river.
- The catchment area is 832 sq. km.
- The maximum flood discharge works out to 18764 Cusecs for a C value of 400 in Ryve's formula.

Koraiyar River

- Koraiyar originates from KaruppurReddipatty hills in Manaparai Taluk flows through Kulathur Taluk of Pudukottai district and enters Sri Rangam Taluk in Trichy District.
- The length of the river is 75 kms
- Crosses Uyyakondan channel at Puthur weir.
- There after the river flows as Kodamuruti.
- Ariyar confluences with Koraiyar at about 600 m upstream of Puthur weir.
- Catchment area is 632 sq. km.
- Maximum flood discharge 15658 cusecs for a C value of 400 in Ryve's formula

Ponnaniar River

- The jungle stream originates from Kadavoor hills and traverses through east in Manapparai Taluk for a distance of 32 km and joins with river Ariyar.
- The Ponnaniar Reservoir is situated in Mogavanur village of Manaparai taluk across river Ponnaniar river.
- The Reservoir with a catchment area of 33.60 sq. miles is designed for a design discharge of 7028 Cusecs.
- Ponnaniar River is one of the three tributaries to Ariyar River, the other two tributaries being Therkumalayar and KannuthuOdai.
- the flow in Ponnaniar is not perennial but the flood flows contribute to a greater extent in flooding the Trichy town

Uppar River

- Uppar River originates from the surplus of Pulivalam Tank and Omadur big tank and also from the high lands of Sathanur and Pulivalam reserve forests and joins Uppar river through small streams.
- After traversing a distance of 48 kms towards the South East direction from its origin, it changes its direction towards East and confluences with Coleroon, near Alambadi

- Village in Lalgudi Taluk. The reservoir site is at 2.50 km from VadakkuThathamangalam village and is at 6 km from Trichy – Thuraiyur main road.
- Uppar reservoir is constructed across this river with a capacity of 2.265 M.Cum (80 MCft) capacity near Sirupathur village, Lalgudi Taluk in Trichy district at 10° 59' 0" N latitude and 78° 42' 0" E longitude

TANKS MAINTAINED BY ARIYAR BASIN DIVISION, TIRUCHIRAPALLI.

Ariyar Basin Division is maintaining 98 non-system tanks in 8 taluks of Trichy districts. The Capacity of the 98 tanks is around 2258.314 MCft and in total they irrigate around 9109.59 Ha of land.

The taluk wise tanks maintained by Ariyar Basin division is tabulated.
